## Anticipated Impact of Proposal (on Public/ Customers/ Staff/ Members/ Reputation etc)

evelopment of the Local Plan is a statutory requirement as this guides and encourages the future growth and development of the District the next 20 years. Having an up to date adopted Local Plan will contribute to the sustainable development of the District in providing sufficient and employment taking into account the impact on the environment. It must be prepared in accordance with the Planning & Compulsory ase Act 2004 as well as the Town & Country Planning (Local Planning) Regulations 2012. This means that there are necessary costs iated with its preparation in terms of input from external expertise where required, consultation and engagement with the local community atutory consultees, an examination in public and its delivery. An adopted Local Plan will reduce the risk of receiving hostile planning ations, inappropriate development and will encourage an environment in which businesses and people can flourish. Future costs are idant upon progress of the plan but they are anticipated at: 2015/16 £165,000. 2016/17 £150,000. Legal costs will be met from the Housing ing Delivery Grant (£100,000). Does not include future costs for CIL and master-planning of sites.

hbourhood plan is a new type of plan introduced in the Localism Act, 2011. It is a community led plan for guiding development and the use d in a particular neighbourhood area and has to be in general conformity with Council's Local Plan. The Council has a duty to assist with the ration of neighbourhood plans. A neighbourhood plan must be prepared in accordance with the Neighbourhood Planning (General) ations 2012. Following consultation, an examination and a successful referendum a neighbourhood plan will become part of the statutory opment plan. <u>At present</u> there is available funding from DCLG for planning authorities who are assisting with the preparation of such plans the referendum stage. This is set at £30,000 which is released following completion at various milestones, the £10,000 has been based upon o plans we are aware of to cover costs (eg referendum and associated costs) up until the first opportunity to claim funds from the nment. It is the Local Authority's responsibility to arrange and fund the referendum.

requirement of the NPPF that planning policies should be based on robust and up-to-date assessments of the needs for open space, sports creation facilities and opportunities for new provision. Sport England, a statutory consultee to the Local Plan, considers that the NHDC Space Study prepared in 2009 does not sufficiently address the current and future needs of the local community for outdoor sport provision e purposes of plan making as set out in the current guidance. A revised outdoor sports study will inform the Local Plan and guide opment Management in determining planning applications. It will also provide opportunities for Leisure Services in terms of management and ion of outdoor sports facilities that meets the needs and aspirations of all sectors of the population, and will assist in guiding future ment strategies for sport provision by the Council and other potential providers. Consultants will be required to undertake the study as there sufficient staff resource or specialist expertise to carry out this necessary detailed work which will take 6 to 9 months to complete. It is ble that the cost of this Study could be capitalised once it is completed and put into use.

rt of the Local Plan the Council needs to adopt an Economic Vision with strategic aims and objectives. In order to support this the Council reviously earmarked some funding for the provision of an Economic Development post in the Housing and Planning and Delivery Grant ve. This proposal seeks to explore the funding options available, including working jointly with other bodies and organisations in order to e a post to deliver these aims and objectives in a sustainable way.
