Nothing comes to mind

No but you might like to check the spelling of "improvements".

no

Maybe have a link more prominent on the intranet webpage

No, it is very straight forward.

None

No its a good system and excellent service

Could 'activate account' be added as a resource item please. If I need to request for the acolaidsuper account to be activated for IDOX either for maintenance or to fix something, at the moment I log it under 'Acolaid'. As a user, 'activate account' feels more relevant but from your perspective, you may wish to leave it as the software that is being worked on.

Please let us know of any ways you feel we can improve the IT Helpdesk Service

always been very prompt and helpful so unable to answer previous question as did not need to improve

i tel kevin because i could not get access to intranet & when tel 4444 they could also not get access.

None

I have always found the IT Helpdesk service to be very good so I did not know how to answer the last question as its always been good

(I have only been here since april so cant comment much on improvements- hence score of 3 for previous question)

I think some telephone handling training would be beneficial for the newer members of the team. Sometimes when a call is picked up, there is loud clattering as someone has pressed 'call pickup' before lifting the receiver. The caller gets deafened with the sound before they receive the corporate greeting. Several members of our team have commented on it, and it doesn't provide a professional impression of the helpdesk team.

Re question about improvement, only marked 3 as new to organization so no previous knowledge.

I really like the on-line reporting facility and the fact that a request results in an automatic acknowledgement. The officers dealing with requests are usually very quick to respond and generally resolve issues very promptly as far as they are able to. Altogether an excellent service.

The service from staff is normally very, very good. Its just a shame that it appears that the issues are generally always the same - (slowness in applications as a result of Egress being the main one!)

Keep going excellent service thank you

Do you have any recomendations for improvment

no

the only problem was that IT forwarded/contacted CSC regarding me being unable to log into CRM/Achieve and this was then left with CSC to sort, but I have still not heard anything back from them. I checked myself to see if I could log in and found it had been sorted by CSC but I was not advised
