## **General Update**

The current status of the project is illustrated in the 'project update section' above and the full project plan in the corresponding section below.

The key items to highlight at this stage:

# **Meeting of Council**

A report will be presented to Council on 16 July 2015 providing an update on the current position of this project.

#### Front Entrance

As reported at the last area committee, works to the external part of the front entrance is being undertaken outside of the main construction contract. The original estimate was to complete this work by 1 July 2015, however, there has been subsequent delays as a result of difficulties in sourcing materials. The Council's Architect has given a revised completion date of the 30 July 2015.

#### **Construction contract**

Practical Completion certificate was issued to the construction contractor on Friday 26 June 2015, therefore the construction contract is complete and the twelve months dilapidation period has commenced.

## Museum fit out

The fit out contractor has produced computer animated 3D models to assist them to draw up the detailed showcase designs. The cases are being built ready for installation on site. Installation of the fit-out work commenced on site week commencing 29<sup>th</sup> June 2015.

### **Audio-Visual**

The Audio-Visual aspects of the museum are coming on extremely well. The Audio Visual fit out contractor has produced three excellent shadow theatre folktale scripts, and engaging scripts for the four Biggin scenarios. The next Audio-Visual task is to label the photographs which will be displayed on digital screens; visitors will see changing digital images of every village in North Hertfordshire, and many of our paintings.

## **Project Plan**

The project plan provides an overview of the entire project and the key tasks that have or need to be undertaken.
