(ii)	Barley Village – Traffic Calming (Feasibility)	Roger Flowerday 01438 757800	Option 1 - £7,250 Option 2 - £15,500	Awaiting Confirm ation on funding	Awaiting Confirma tion on funding	Red	- Great Ashby Way & Cleveland Way Roundabout, Gt Ashby Vehicles parking on the roundabout which causes problems for larger vehicles trying to negotiate the roundabout.  - Blackdown Close, Gt Ashby Vehicles parking too close to the junction affecting visibility  To date it is clear that despite all best endeavours, an outcome that satisfies local expectation for dealing with concerns surrounding traffic in the village has not been achieved, therefore it is proposed that a different approach is adopted. In our opinion the most effective way for the parish to make purposeful progress towards realising its aspirations would be to focus its energy on developing a parish plan. Once the Parish Plan is completed then the Parish will be in the

	position to compete for funding from HCC's core budget programmes. An outline of the process and support provided by the Community Development Agency for Hertfordshire has previously been provided.  There are two ways to proceed if the JMP give its support to further feasibility, design and consultation work. Option 1 would be to focus solely on developing a scheme which includes chicanes, although the costs to achieve this solution may ultimately require the purchasing/dedication of third party land.
	Option 2 would be a more holistic approach similar to the process operated in the Parish Plan where by a consultation process would be undertaken to establish all the traffic related concerns in the village and
