

Appendix A

Investment Strategy (Integrated Capital and Treasury Strategy)

Part 1- Overview

Introduction

The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low risk counterparties or instruments commensurate with the Council's risk appetite, providing adequate security and liquidity initially before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer-term cash flow planning, to ensure that the Council can meet its capital spending plans. This management of longer-term cash may involve arranging long or short-term loans or using longer-term cash flow surpluses.

The Chartered Institute of Public Finance and Accountancy (CIPFA) define treasury management as:

“The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

This strategy now provides an integrated view of capital spend and income, alongside treasury management. This is because long-term Treasury management is inextricably linked to the funding of the capital programme. There is also a requirement to apply treasury management principles to any capital spend that is not related to service provision.

The format of this strategy is as follows:

Part 2- Capital Spend

- A summary of the Council's current capital assets. For those assets that are not held for service provision, an assessment against the principles of Security, Liquidity and Yield.
- Forecasts of the capital and revenue spend required to maintain those assets.
- Planned spend on new capital assets, with the additional assessment of risk, security, liquidity and yield for those assets that are not being acquired for service provision.
- This part of the strategy therefore gives a complete picture of forecast capital spend.

Part 3- Capital balances, receipts and the Capital Financing Requirement (CFR)

- Forecasts of expected receipts from the sale of surplus capital assets.
- Comparing capital spend forecasts with capital reserve balances and forecast future receipts gives the Capital Financing Requirement, which is the Council's need to borrow.

Part 4- Borrowing Strategy and Minimum Revenue Provision (MRP)

- This leads to the setting of a borrowing strategy which sets out how to borrow, when to borrow and for how long.
- Where the Council has a borrowing requirement, then it is required to set a policy on Minimum Revenue Provision.

Part 5- Investment Strategy

- This is then all combined to determine the levels of cash that the Council will have available for investment. This leads to an investment strategy that determines where to invest any balances, including limits on types of investments.

Part 6- Overall Risk considerations

- To consider the cumulative risks that the Council faces that arise from the totality of this strategy.

Part 7- Glossary of terms

- To explain the various terms used in this strategy.

The strategy sets a number of prudential and treasury indicators. A prudential indicator is one which is required by statutory guidance, whereas a treasury indicator is one that is set locally to provide information on performance.

Reporting requirements

Full Council will receive and approve three reports during the year:

- The Integrated Capital and Treasury strategy (this report)
- A mid-year review
- An annual report on the performance of the treasury management function, on the effects of the decisions taken and the transactions executed in the past year, and on any circumstances of non-compliance with the organisation's treasury management strategy

Each of these reports will be reviewed by the Finance, Audit and Risk (FAR) Committee and Cabinet. The FAR Committee and Cabinet will also receive reports on the position as at the end of the first (to end of June) and third (to end of December) quarters. The FAR Committee undertakes an oversight role.

These reports will provide relevant updates on performance against the prudential and treasury indicators.

Basis of Estimates

The estimates contained within this strategy are based on the best information that can reasonably be obtained. For forecasts of spend on assets (revenue maintenance, capital maintenance and capital acquisitions) this is based on a combination of previous experience, indicative quotes, condition surveys and professional advice. The estimates of capital receipts are provided by the Council's Senior Surveyor and are prudent estimates based on expected use, type of sale, market conditions and (where applicable) the status of negotiations to date.

The Council has experienced some cost increases on capital projects in the past. These have generally arisen from delays in the start of the project and subsequent inflation rather than incorrect estimates. Budget Holders have been asked to be as realistic as they can be about the timing of projects and ensure that forecast costs are aligned to the expected timing. There will also be external factors that affect estimates, particularly the impacts of the United Kingdom's withdrawal

from the European Union and ongoing uncertainty over Covid-19. For capital projects, there is some flexibility to the extent to which they can overspend without further approval (ranging from 5% to 20% dependant on value) and this is considered in setting this overall strategy and in the quarterly monitoring.

Treasury Management Policy and Treasury Management Practices

In line with guidance from the Chartered Institute of Public Finance and Accountancy, the Council sets the following treasury management policy:

1. This Council defines its treasury management activities as: The management of the organisation's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.
2. The Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation, and any financial instruments entered into to manage these risks.
3. The Council acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.

The Council also has treasury management practices (TMPs) which set out how the Council will carry out, manage and control the achievement of the policy above in practice. These TMPs follow the recommendations contained within the Code of Practice on Treasury Management (published by CIPFA), subject only to amendment where necessary to reflect the particular circumstances of the Council. Such amendments are minor and do not result in any material deviation from the Code's key principles. The TMPs cover the following areas:

- TMP1- Risk Management
- TMP2- Performance Measurement
- TMP3- Decision making and analysis
- TMP4- Approved instruments, methods and techniques
- TMP5- Organisation, clarity and segregation of responsibilities, and dealing arrangements
- TMP6- Reporting requirements and management information arrangements
- TMP7- Budgeting accounting and audit arrangements
- TMP8- Cash and cash-flow management
- TMP9- Money laundering
- TMP10- Staff training and qualifications
- TMP11- Use of external service providers
- TMP12- Corporate Governance

Treasury Consultant

The Council renewed its contracted with Link Asset Services to provide treasury management advice for the three year period October 2019 – September 2022. It is recognised that the responsibility for treasury management decisions remains with the Council at all times and the Council will ensure

that undue reliance is not placed upon Link. However, there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented.

The performance of the treasury consultant is assessed through regular meetings and the justifications for the advice provided.

Skills and culture

It is important that decision makers are given the information that they need to make those decisions. Given that treasury and risk management can be a complex area; this should be accompanied by the availability of appropriate training. To address the availability of information, all Council, Cabinet and Committee reports include sections on both financial and risk implications. Where a decision is more financial in nature then these considerations will be detailed throughout the report. Table 1 details the key groups in relation to decision making and the training that has been made available. This strategy is required to disclose the steps that have been taken to provide training, and it is up to individual members of those groups to ensure that they take advantage of the opportunities offered.

Table 1

Group	Reason for training	Training that has been made available
Full Council (All Councillors)	<p>Required to formally adopt this Strategy.</p> <p>Required to approve any capital purchase over £2.5m.</p>	<p>Annual training that provides an introduction to Local Authority funding and accounting did not take place due to Covid-19 and that there were no elections, so no new Councillors. To be reinstated during 2021.</p> <p>Training session in 2018/19 provided by Link (the Council's treasury advisors) on risk and how it can be assessed, particularly in relation to capital investment.</p> <p>To review when to re-run this session.</p>
Finance, Audit and Risk Committee	<p>To review the Council's policies on Treasury, Capital and the Medium-Term Financial Strategy.</p> <p>To monitor the effective development and operation of risk management.</p>	<p>Members of the Committee (and substitutes) are encouraged to complete a skills self-assessment. This allows the targeting of specific training.</p> <p>Regular reporting to the Committee on Capital, Risk and Treasury provides the opportunity to ask questions.</p>
Chief Finance Officer and Finance Team	<p>Responsibility for the financial management of the Council (under s151 of Local Government Act, 1972), including capital and treasury management.</p> <p>Provide advice to Budget Holders in respect of financial management.</p> <p>Responsible for reviewing and amending the financial implications sections of reports.</p>	<p>Ongoing Continuing Professional Development for all qualified members of the finance team, including focused training for specific areas of responsibility.</p>
Senior Management Team (SMT)/ Officer Leadership Team (LT)	<p>Individual Service Directors will be responsible for putting forward proposals.</p> <p>Proposals will be reviewed by the Senior Management Team prior to taking through the Committee process.</p> <p>Members of SMT are likely to be involved in negotiating commercial deals.</p>	<p>Training session on risk, risk appetite and assessing risk.</p> <p>Regular updates on the Council's funding and finances, including significant changes in regulations.</p> <p>Training on the core principles of the prudential framework.</p>
Political Liaison Board (Joint Member and Officer Leadership Team)	<p>Cabinet makes recommendations to Council on the policy direction and budget for the Council.</p> <p>Approves capital spend up to £2.5m.</p>	<p>Presentations on the implications of the CIPFA Financial Management Code to help ensure effective financial governance and sustainability.</p>

Part 2- Capital Spend

Current Capital Assets

As at 31st March 2020, a summary of the capital assets owned by the Council is shown in table 2 below.

Table 2

Asset Type	Asset	Reason for ownership	Value (£000)
Investment Properties	Various	Retained to generate income	17,785
Surplus Land and buildings	Various	Held for future sale or development	17,307
Offices and Storage	DCO	Staff offices, customer service centre and democratic facilities	5,075
Offices and Storage	Unit 3	Off-site storage, back-up IT and emergency planning	400
Leisure Facilities	Hitchin Swim Centre / Archers	Service use	7,021
Leisure Facilities	Letchworth Outdoor Pool	Service use	2,605
Leisure Facilities	North Herts Leisure Centre	Service use	12,109
Leisure Facilities	Royston Leisure Centre	Service use	7,172
Leisure Facilities	Pavilions	Service use	1,676
Leisure Facilities	Recreation Grounds / Play Areas / Gardens/Allotments	Service use	5,978
Community Centres and Halls	Various	Community facilities, generally operated by third parties	11,259
Markets	Hitchin Market	To provide a market	134
Museums and Arts	Hitchin Town Hall and District Museum	District-wide museum and community facility	12,254
Museums and Arts	Letchworth and Hitchin museums, Burymead store	Museum storage	1,398
Cemeteries	Various	Service use	1,419
Community Safety	Various CCTV cameras	Service use	23
IT	Various computer equipment and software	To enable the delivery of other services	240
Parking	Various car parks	Service use	9,368
Waste Collection	Bins	Service use	509
Waste Collection	Vehicles	Service use	2,270
Public Conveniences	Various	Subject to leases/ management arrangements	503
Other	Various	Various	436
Total			116,941

Table 3 shows the capital expenditure that has been incurred during the year, or is forecast to be spent in the remainder of the year:

Table 3

Asset Type	Asset	Reason for purchase/ expenditure	Value (£000)
Investment Properties	Residential Housing	To enable the conversion of Harkness Court to increase housing provision in the District	30
IT	Various computer equipment and software	To maintain IT service and provision of equipment in the Council Chamber	694
Various	Various	Capital maintenance of Council buildings/land	668
Leisure Facilities	Hitchin Swim Centre / Archers	Replace Outdoor Boiler	40
Leisure Facilities	Letchworth Outdoor Pool	Replace Outdoor Boiler	40
Leisure Facilities	North Herts Leisure Centre	Refurbish Members Changing room and upgrade Circulation Pipe work	259
Leisure Facilities	Leisure Condition Survey	Improvements to various Leisure sites	87
Leisure Facilities	Recreation Grounds / Play Areas / Gardens	Refurbishment of play areas.	147
Cemeteries	Various	St Johns and Wilbury Hills Path enhancement	20
Museums and Arts	Hitchin Town Hall and District Museum	Mainly works to the Town Hall	188
Museums and Arts	Museum storage	Museum storage solution	100
Parking	Multi-storey car parks	Lighting at Letchworth Multi-storey, wall works at Lairage Car Park, lift refurbishment at Lairage, resurfacing Lairage.	871
Parking	Off Street	Upgrade pay and display machines and resurfacing	53
Community Centres and Halls	Various	Grants for refurbishment of community facilities. Relates to properties that are not owned by the Council (REFCUS).	572
Grants	Various	Disabled Facilities Grants and private sector housing grants S106 Grants (REFCUS)	239
Total			4,008

Capitalisation Policy:

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classed as Property, Plant and Equipment.

Expenditure, above the de-minimis level, on the acquisition, creation or enhancement of property, plant and equipment is capitalised on an accruals basis provided that it is probable that the future economic benefits or service potential associated with the item will flow to the authority and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) or is below the de-minimis level, is charged as an expense when it is incurred.

The Authority's de-minimis level is £20,000 for property and £10,000 for vehicles, plant and equipment.

The Council will provide grants that fund works on assets that it does not own. This expenditure can be treated as capital expenditure, even though it does not create an asset that the Council would then own or recognise. This is known as revenue expenditure allowed to be funded by capital under statute (or REFCUS).

For the assets that the Council owns (or plans to purchase in the year) that are **not** for service delivery, the security, liquidity and yield in relation to these have been considered. For these assets it is up to the Council to determine how it balances these, and this will depend on its risk appetite. This analysis is shown in Table 4. In most cases, assets are grouped together by type. Assets that are held for income generation purposes are revalued annually. This valuation is on a fair value basis. Unless detailed below the asset is considered to provide sufficient security.

Definitions:

Security- In traditional treasury terms, this is the possibility that other parties fail to pay amounts due to the Authority. For commercial investments it relates to how susceptible they are to changes in value and market conditions.

Liquidity- This is the possibility that the Authority may not have funds available to meet its commitments to make payments. In general it relates to how easy it is to sell an asset.

Yield- The income return on an investment or asset, such as the interest received or rental income from holding a particular investment or asset.

Table 4

Asset (or type of asset)	Security	Liquidity	Yield
Ground leases- mainly of commercial premises in Royston, Letchworth and Hitchin (£15.6m by value)	Generally subject to long leases where the land has been built on. The building would become owned by the Council if there was a default on the lease agreement. Therefore, high security.	It is possible that the Council could try and sell to the leaseholder. Otherwise low liquidity in common with commercial premises.	The assets have been owned for a number of years. Valuations are based on the yield generated.
Churchgate Shopping Centre, Hitchin-ground lease (value £1.8m)	A long lease with upward only rent reviews. However, this is dependent on amounts due being paid. The Covid-19 restrictions mean that amounts are currently overdue.	On the basis that it generates a reasonable rental stream, likely to be some interest as an investment. Current rental stream is affected by the current Covid-19 restrictions. Therefore, low liquidity, which may improve when Covid-19 restrictions cease.	Valuations are based on the yield generated.
Letchworth Town Hall (value £0.6m)	25 year lease (from 2012) where the tenant has provided significant investment.	Very low liquidity as would require someone to be interested in this type of building. Listed so would limit redevelopment.	Valuations are based on the yield generated.
Beverley Close Store, Royston (value £0.1m)	15 year lease from 2017	Low liquidity in common with commercial premises.	Valuations are based on the yield generated. Previously used as a Council store and a decision was made to retain for rental income.
Residential housing (Harkness Court)	The demand for housing is considered to be greater than an office building. Therefore, the expenditure on a conversion scheme is expected to increase the security of the asset.	The liquidity of the asset increased with the granting of planning permission and building regulation approval. Will continue to increase as conversion works progress. On completion will have quite high liquidity.	Not currently generating any income. The conversion will increase the capital value / enable generation of rental income.
Other assets valued at less than £0.1m (£0.3m in total)	Not fully assessed	Not fully assessed	Not fully assessed

Definitions:

Fair Value: The price that would be received to sell an asset in an orderly transaction between market participants at the measurement date.

For each of the assets in table 4, there is also a requirement to carry out a fair value assessment that demonstrates that the underlying assets provide security for the capital invested. There is a further requirement to carry out an assessment of the risk of loss. This assessment generally relates to investments in commercial activities so includes items that may be less relevant to the majority of our assets. In total the risk assessment covers:

- Assessment of the market that competing in, including nature and level of competition, market and customer needs including how these will evolve over time, barriers to entry and exit, and ongoing investment required.
- Use of external advisers and how the quality of these is monitored
- Whether credit ratings are used and how these are monitored
- Any other sources of information that are used

The assessments described above are shown in table 5. In most cases the assets are grouped together by type.

Table 5

Asset (or type of asset)	Fair value assessment	Assessment of the risk of loss
Ground leases- mainly of commercial premises in Royston, Letchworth and Hitchin (£15.6m by value)	Valued on a fair value basis. The valuation is based on rental yields.	Subject to competition from other sites within the same industrial areas and other locations. Difficult (uneconomic) for current lessees to exit due to lease terms and investment in the site. Any maintenance is the responsibility of the leaseholder.
Churchgate Shopping Centre, Hitchin- ground lease (value £1.8m)	Valued on a fair value basis. The valuation is based on rental yields.	External valuations have been commissioned in recent years. These have highlighted the difficulties that face retail and shopping centres in particular. These difficulties have been heightened by the current Covid-19 restrictions. It is unclear whether this additional impact will be ongoing when restrictions are lifted. Whilst, the freehold that the Council has is on beneficial terms which would usually provide investment returns, these returns are uncertain when the leaseholder is unable to generate income to afford to pay them. Whilst maintenance is the responsibility of the leaseholder, this will be impacted by availability of funds. Valuation reports have been checked and challenged by the Council's chartered surveyors.
Letchworth Town Hall (value £0.6m)	Valued on a fair value basis. The valuation is based on rental yields.	The building has some unique features in relation to its prominence and location. However, overall, there currently is an over-supply of office accommodation in Letchworth. Difficult (uneconomic) for current lessees to exit due to lease terms and investment in the building. Any maintenance during the lease term is the responsibility of the leaseholder.

Asset (or type of asset)	Fair value assessment	Assessment of the risk of loss
Beverley Close Store, Royston (value £0.1m)	Valued on a fair value basis. The valuation is based on rental yields.	Subject to competition from other sites within the same industrial areas and other locations. Currently let to a company with significant property interest nearby. Might be difficult to re-let.
Other assets valued at less than £0.1m (£0.3m in total)	Not fully assessed	Not fully assessed

Under the 'Use of Capital Receipts Direction', the Council can treat certain specified revenue spend as capital. Further details of the direction are shown below. Where this direction is used, the spend is included in the capital forecasts in tables 3, 6 and 7.

Use of Capital Receipts Direction:

The Capital Receipts direction has been used to fund the decommissioning of pavilions and play areas in 2018/19. There are no plans to make further use of the Direction in the period 2021/22– 2025/26.

For all assets the future capital cost of maintaining those assets has been considered, and gives the following future capital spend requirements (table 6).

Table 6

Asset	Description of future capital expenditure	Forecast Capital Expenditure (£000)					
		2021/22	2022/23	2023/24	2024/25	2025/26	2026/27 to 2030/31
Existing Capital Programme-schemes 2021/22 onwards							
Various	Capital maintenance based on condition surveys	255	0	0	0	0	0 (tbc)
Cemeteries	Ickneild Way, St Johns and Wilbury Hills - Enhance Footpaths	60	0	10	50	0	30
Computer Software & Equipment	To maintain IT services	87	492	133	458	494	1,174
Lairage Multi-storey car park		111	0	0	0	0	0
Hitchin Swim Centre	Refurbishment / Boiler Replacement	0	30	40	200	300	605
Letchworth Outdoor Pool	Boiler Replacement	0	0	40	0	0	0
North Herts Leisure Centre	Various Refurbishments	50	330	250	0	0	270
Royston Leisure Centre	Various Refurbishments	0	255	0	150	0	300
Various	Growth Fund Projects	713	0	0	0	0	0
Various	Private sector housing grants (REFCUS)	60	60	60	60	60	300
Various Leisure Facilities	Condition Survey enhancements	0	0	107	0	0	0
Various Off-Street Car Parks	Resurfacing / Lighting	163	56	8	0	0	0
Various Parks and Playgrounds	Enhancements	180	270	435	215	180	900
New Capital Programme							
Coombes Community Centre	Improve Underground Drainage	25	0	0	0	0	0
Computer Software & Equipment	To maintain IT services	90	0	60	55	40	230
Hitchin Swim Centre	Replacement of Domestic Hot Water Calorifer	25	0	0	0	0	0
Lairage Multi-storey car park	Cosmetic coating to four stairwells and replacement windows and doors	75	0	0	0	0	0
Newark Close	Road Replacement	65	0	0	0	0	0
North Herts Leisure Centre	Replacement of Sport Hall heating system	30	0	0	0	0	0
Royston Leisure Centre	Solar Thermal Installation	50	0	0	0	0	0
Thomas Bellamy House	Structural and roof enhancements	65	0	0	0	0	0

Asset	Description of future capital expenditure	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27 – 2030/31
Various Parks and Playgrounds	Enhancements	45	10	0	0	0	0
Reprogramming (as at Quarter 2)							
Various off-street car parks	Resurfacing / Lighting	75	0	0	0	0	0
Total		2,224	1,503	1,143	1,188	1,074	3,809

The totals for 2026/27 to 2030/31 are estimates only and could be subject change. These should be treated as early indications only, and formal approval of these amounts is not required.

The revenue maintenance of these assets has also been considered. The Council has chosen to allocate a central budget of £185k per year for this purpose. For 2021/22 there is a recommendation in the revenue budget that this is increased by £122k for one year, before returning back down to the previous level. This increase will allow a number of proactive maintenance works to be carried out, whilst maintaining provision for reactive works.

New Capital Assets

There are also proposals for the following capital expenditure on new capital assets and expenditure on existing assets that is not related to capital maintenance (table 7).

Table 7

Asset	Reason for capital expenditure	Forecast Capital Expenditure (£000)					
		2021/22	2022/23	2023/24	2024/25	2025/26	2026/27 to 2030/31
Existing Capital Programme-schemes 20120/21 onwards							
Property acquisition and development	As per property acquisition and development strategy	4,000	4,000	4,000	4,000	0	0
NH Museum and Community Facility	Museum Storage Solution	1,100	0	0	0	0	0
On-Street Parking	Parking Charging, Payment & Management	285	0	0	0	0	0
Walsworth Common Pavilion	New pavilion	0	300	0	0	0	0
Royston Leisure Centre	Extension to provide a new multi-functional room and increase size of fitness room	0	1,000	0	0	0	0

Waste and Recycling	Vehicles	0	0	0	0	4,000	0

Waste and Recycling	Northern Transfer Station	0	0	0	1,600	0	0
New Capital Programme							
Electric Vehicle Charging	Provision of On-Street Electric Vehicle charging	100	0	0	0	0	0
Elections	Polling Booths / Boxes	27	0	0	0	0	0
Off-Street Parking	Parking Machines Upgrade - Contactless Payment Facility Installation	36	20	0	0	0	0
Off-Street Parking	Parking Machines Replacement	0	0	0	0	150	150
Reprogramming (as at Quarter 2)							
Property acquisition and development	As per property acquisition and development strategy	4,000	0	0	0	0	0
Develop housing at market rents	Increase provision of housing at market rents	2,946	0	0	0	0	0
Total		12,494	6,416	4,000	5,600	4,150	150

Below is an estimate of the total capital expenditure to be incurred in the years 2021/22 to 2025/26. This is based on tables 6 and 7. This is a Prudential Indicator and the Council is required to set a target for it and monitor against it during the year.

Prudential Indicator 1: Estimate of total capital expenditure to be incurred in years 2021/22 to 2025/26

Year	£m
2021/22	14.718
2022/23	7.919
2023/24	5.143
2024/25	6.788
2025/26	5.224

A full list of planned future capital expenditure (2021/22 onwards) is provided as Appendix A1. A list of new capital schemes and schemes planned to commence from 2021/22 is provided in Appendix A2.

Where this proposed expenditure does not relate to service delivery, the security, liquidity and yield in relation to this spend has been considered (table 8).

Table 8

Asset (or type of asset)	Security	Liquidity	Yield
Residential Property	<p>The underlying value of residential property generally appreciates over the medium term due to the overall shortage of supply. The focus on developing new properties or converting existing properties to residential will also help to ensure security due to the expected uplift in value. Individual market factors will be considered prior to acquisition.</p> <p>Where retained it is likely that the property will be held through a company. The Council's interest will therefore be secured via a loan or equity holding. Any loan can be secured against property. Any equity interest does not offer the same security, but it may be required due to HMRC rules on the funding of companies or for another commercial reason.</p>	<p>Property is a medium to long-term asset due to the costs of buying and selling. However, it is generally possible to sell residential property within a reasonable time-frame if priced accordingly.</p>	<p>The expected rental yield will be compared to the costs of acquisition or construction as part of the business case.</p>
Investments in line with the Property Acquisition and Development Strategy (£20m)	<p>As detailed in the Property Acquisition and Development Strategy, the security of investments will be given a high weighting in determining which ones to take forward. However there will always be some risk relating to both general market conditions and specific factors relevant to individual properties. Spreading the total investment over a number of properties will help mitigate the second of these.</p>	<p>Property is a medium to long-term asset due to the costs of buying and selling, and that property markets can be cyclical in nature. The Property Acquisition and Development Strategy targets those properties that are considered to be more liquid e.g. they have a wider range of tenants and/ or uses.</p>	<p>To reflect the risk of property investment a net surplus of 1-1.5% (above borrowing, administration and acquisition costs) will be targeted as a minimum. Any target surplus will be commensurate with the level of risk.</p>

For these assets, table 9, also details an assessment of the risk of loss. This covers the same factors that have been detailed previously. Where relevant, assets have been grouped together.

Table 9

Asset (or type of asset)	Assessment of the risk of loss
Residential Property	This will be fully assessed as part of the business case for the acquisition of any properties.
Investments in line with the Property Acquisition and Development Strategy	This will be fully assessed as part of the business case for the acquisition of any properties.

Part 3- Capital balances, receipts and the Capital Financing Requirement (CFR)

Capital Funding

The Council forecasts the following additions to its capital receipts (table 10). All the planned disposals are surplus land that is being sold to generate capital receipts. The disposals will also reduce the risks and costs of holding the land. Due to the potential impact on negotiations over disposal values, individual values are not detailed.

Table 10

	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27 to 2030/31
Forecast Receipts (£000)	4,173	11,200	0	Tbc	Tbc	Tbc

The above timing and values are an estimate only. Actual timings will depend on market conditions and time taken for planning permission to be granted (where sales values are subject to planning). The Council will seek to maximise the sales values it can achieve.

As a result of planned expenditure in 2020/21 and future years, the Council forecasts the following use of funding for capital (table 11).

Table 11

Funding Source	Brought forward (at 31/3/20)	Forecast expenditure and funding sources (£000)						
		2020/21	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27 to 2030/31

Borrowing requirement		0	5,248	0	1,100	6,629	1,224	3,959

Definitions:

Capital receipts- money received from the sale of surplus assets.

Set-aside receipts- previously money generated from the sale of surplus assets was not defined as capital receipt. The residual funding that the Council has (which is mainly from the sale of its housing stock to North Herts Homes) is treated as a set-aside receipt. In essence these are treated in the same way as capital receipts.

The borrowing requirement is the balancing item. It is also known as the Capital Financing Requirement (CFR). This is a Prudential Indicator and the Council is required to set a target for it and monitor against it during the year.

Prudential Indicator 2: Capital Financing Requirement

Year	£m
As at 31 st March 2020 (actual)	-5.6
As at 31 st March 2021 (forecast)	-4.7
As at 31 st March 2022 (forecast)	5.1
As at 31 st March 2023 (forecast)	5.1
As at 31 st March 2024 (forecast)	6.2
As at 31 st March 2025 (forecast)	12.9

Where the Council has a Capital Financing Requirement (i.e. the borrowing requirement is positive) then it:

- Must make a charge to revenue for a Minimum Revenue Provision.
- Can choose whether to borrow internally or externally.

Part 4- Borrowing Strategy and Minimum Revenue Provision (MRP)

Borrowing strategy

Definitions:

Internal Borrowing- Even when the Council has no capital reserves, it can borrow internally against its revenue balances and reserves. This uses the cash that is available and is different to funding capital from revenue. The Council is still required to have a Minimum Revenue Provision but does not incur any external interest costs. Interest income from investing the revenue balances and reserves would be lost.

External Borrowing- Borrowing from a third party (e.g. Public Works Loans Board, a Local Authority or a financial institution). Interest costs would be incurred, as well as having to make a Minimum Revenue Provision.

Based on Prudential Indicator 2 (page 19) the Council has a Capital Financing Requirement from 2021/22 onwards and therefore does have a need to borrow.

If the Council had a borrowing requirement, then in order to determine whether to borrow internally or externally, it must consider the level of revenue reserves and provisions that it has, and when it expects that these will be spent. Forecasts of the revenue budget give the following estimates (table 12). These totals are also used in determining the cash that it has available for investment.

Table 12

Revenue balance	Brought forward (at 31/3/20)	Forecast balance at year end						
		2020/21	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27 to 2030/31
General Fund ¹	9,378	7,562	6,973	5,527	4,515	4,192	4,846	4,846
Add back MRP	0	0	0	0	0	0	0	0
Revenue Reserves ²	9,344	9,844	10,344	10,844	11,344	11,844	7,844	7,844
S106 balances	3,741	3,779	3,779	3,779	3,779	3,779	3,779	3,779
Provisions	882	882	882	882	882	882	882	882
Outstanding Debt	423	405	5,635	5,353	6,170	12,494	13,047	12,846
Total	23,768	22,472	27,613	26,385	26,690	33,191	30,398	30,197

1 Based on General Fund forecasts as per 'Revenue Budget 2021/22' report.

2 Revenue Reserve balance as at 31/3/20. Then increases in line with contributions to waste vehicle reserve at £500k per year for 7 years. At end of 7 years assumed that this funding will be used to fund new waste vehicles. For simplicity this ignores some of the fluctuations in reserve balances that are detailed in the 'Revenue Budget 2021/22' report.

MRP is added back as it is not an outflow of cash and can be used for internal borrowing. The cash outflow happens when the borrowing is repaid. As explained in the Revenue Budget report, MRP has not been reflected in the revenue budgets so there is not a need to add it back.

As well as the availability of revenue funding, the Council would also need to consider the advantages and disadvantages of external borrowing. Interest rates are at very low levels and may stay at the current level for some time. Even if the Bank of England base rate went to zero or negative, it seems unlikely that Council borrowing rates would fall any further. There has recently

been a reduction in the Public Works Loan Board (PWLB) rates (by 1%) that reverses the increase applied in October 2019. The increase was designed to prevent Councils from using the PWLB for commercial investments and has been replaced by restrictions of when the PLB can be used. So whilst it may not be some time, the cost external borrowing will increase in the future. Whilst unlikely at the moment, it may become possible to generate higher returns from investing revenue reserves than the interest costs that would be saved. However, this has to be balanced against the certainty of interest costs that will be incurred as soon as borrowing is taken out. There is also a need for the Council to retain a certain buffer of revenue reserves as cash to manage the peaks and troughs in its cash balances. Whilst the Council can borrow for short-term cash-flow needs, this can become expensive. Whatever strategy is adopted, it should be prudent.

Without the forecast capital receipts income, the Council's borrowing need would be a lot higher. These receipts are subject to estimates both in terms of value and timing. Given this uncertainty it is considered that the Council should assume that it will need to borrow externally. This will be given further consideration at the time that any borrowing is needed. If the forecast is that the need is more likely to just be for a short period (e.g. there is greater certainty over capital receipts) or there is a clearer indication over future interest rates (e.g. they are not likely to rise) then internal borrowing will be reconsidered. It is also possible that there will not be the need to borrow that is identified if there is slippage on the capital programme.

Table 13

	Brought forward (at 31/3/20)	Forecast amount of borrowing in year (£000)							Carried forward (at 31/3/31)
		2020/21	2021/22	2022/23	2023/24	2024/25	2025/26	2026/27 to 2030/31	
Total borrowing requirement	423	0	5,248	0	1,100	6,629	1,224	3,959	0
Made up of:									
Internal borrowing	0	0	0	0	0	0	0	0	0
External borrowing	423	0	5,248	0	1,100	6,629	1,224	3,959	12,848

The brought forward borrowing total is made up of historic borrowing that it is not cost effective to pay off. This is because the interest that would be payable over the course of the remaining loan has to be paid upfront instead. The reduction is due to these being loans that are repaid in instalments.

Definitions:

Operational Boundary: This is the limit beyond which external debt is not normally expected to exceed.

Authorised Limit: This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

Prudential Indicator 3: External Debt

Year	Forecast Borrowing £m	Forecast other long-term liabilities¹ £m	Forecast Total External Debt £m	Operational Boundary £m	Authorised Limit £m
As at 31 st March 2020 (Actual)	0.423	2.125	2.548	3.7	9
As at 31 st March 2021 (forecast)	0.405	1.622	2.027	3.2	9
As at 31 st March 2022 (forecast)	5.635	1.119	6.754	7.9	12
As at 31 st March 2023 (forecast)	5.353	0.616	5.969	7.1	11
As at 31 st March 2024 (forecast)	6.170	0.113	6.283	7.4	12

As at 31 st March 2026 (forecast)	13.015	0	13.015	14.2	19

1 Comprises the finance lease relating to Letchworth Multi-storey car park and the impact of the finance lease for waste vehicles.

The external borrowing forecast can be used to give an indication of the borrowing that may be required, which is combined with outstanding existing borrowing (table 14). The Council will also borrow for short-term cash-flow needs if required. The actual borrowing that is taken out will depend on the latest forecasts and the offers that are available at the time that it is required. There will also be a consideration of when any other borrowing becomes due, with the aim of achieving a spread of these dates. This is to try and avoid refinancing risk. The Council is required to set indicators for the maturity structure of its borrowing. Given the low level of borrowing that the Council currently has and is forecast to have, it is considered appropriate to maintain full flexibility as to the exact duration of any borrowing undertaken. This is reflected in the indicators set out as Treasury Indicator 4 below.

Table 14

Loan Type	Start date	Duration (years)	Maturity date	Amount Borrowed (£)	Balance Outstanding 31/03/21 (£)	Interest Rate (actual or forecast) (%)	Current Annual interest cost (£)
PWLB	08/01/49	80	Oct 2025	5,346	837	3.125	30

Total					405,034		

Definitions:

Refinancing Risk (or Maturity Risk): The risk that if all borrowing becomes due for repayment at the same time that this will be at a time when the costs for taking out new borrowing (refinancing) are very high.

To manage refinancing risk, the Council sets limits on the maturity structure of its borrowing. However, these indicators are set relatively high to provide sufficient flexibility to respond to opportunities to repay or take out new debt (if it was required), while remaining within the parameters set by the indicators. Due to the low level of existing borrowing, the under 12 months limits have a broad range to allow for cash-flow borrowing (if it was required).

Treasury Indicator 4: Maturity Structure of Fixed Interest Rate Borrowing

Maturity period	Lower %	Upper %
Under 12 months	0	100
12 months to 2 years	0	50
2 years to 5 years	0	60
5 years to 10 years	0	100
10 years to 20 years	0	100
20 years and above	0	100

The Council does not place any restrictions on where it can borrow from. This is because the Council will hold the money and therefore there is not a risk around the security of the funds. In practice any borrowing is likely to come from the Public Works Loan Board, UK banks, UK building societies and other Local Authorities. All borrowing will be denominated in GBP Sterling. The decision on any borrowing will be made by the Chief Finance Officer and reflect the advice of the Council's treasury advisers.

The Council can enter in to borrowing arrangements at both fixed and variable rates. Variable rate borrowing has a greater risk and so therefore Treasury Indicator 5 limits the amount of borrowing that can be at a variable rate. To aid administration and monitoring, the limits are shown as £ values but are based on percentages of the Operational Boundary. Borrowing at fixed rates can be up to 100% (inclusive) of the Boundary, and variable rate borrowing can be up to 30% of the Boundary.

Definitions:

Fixed Rate: The rate of interest is set at the point the borrowing is taken out and remains at the same percentage rate for the full term of the loan.

Variable Rate: The rate of interest varies during the term of the loan and usually tracks prescribed indicator rate (e.g. Bank of England base rate)

Treasury Indicator 5: Fixed and Variable Borrowing Rate Exposure

Year	Operational Boundary relating to borrowing excluding long term liabilities £m	Limit on Fixed Rate borrowing £m	Limit on Variable Rate borrowing £m
2020/21	1.6	1.6	0.5
2021/22	6.8	6.8	2.0
2022/23	6.5	6.5	1.9
2023/24	7.3	7.3	2.2
2024/25	13.6	13.6	4.1
2025/26	14.2	14.2	4.3

There is a requirement for the Council to consider the proportionality of the income that it generates from its non-service (investment) assets and how this compares to any borrowing that is linked to those assets. Current and planned investment assets were detailed in table 3 and table 8. Treasury indicator 6 shows the capital value and expected income from these assets, alongside any borrowing that is attached to those assets and the expected cost of that borrowing.

The totals below are based on existing investment assets and spend in line with the capital programme on residential property and investments in line with the Property Acquisition and Development Strategy. The annual income is based on forecasts for the existing investments and an assumed return of 7% for new investments (2.5% MRP + 2% interest + 1.5% margin). The loans are in accordance with the identified need to borrow and the cost of borrowing is assumed at 5.5% (2.5% MRP and 2% interest).

Treasury Indicator 6: Income from investment assets and the costs of associated borrowing

Year	Capital value of investment assets £m	Expected annual income from investment assets £m	Loans linked to investment assets £m	Expected annual borrowing costs for loans linked to investment assets £m
2021/22	29.376	1.177	4.6	0.207
2022/23	33.376	1.997	4.6	0.207
2023/24	37.376	2.327	5.7	0.257
2024/25	41.376	2.607	9.7	0.437
2025/26	41.376	2.887	9.7	0.437

The Council would not borrow money in advance of need or at a low rate to try and reinvest that money to earn a higher interest rate, and profit from the margin between the two rates. However, the new waste contract requires the use of vehicles that are provided by the contractor. The Council has taken the view that it receives the risks and rewards of those vehicle assets. Under accounting regulations, it is therefore required to treat this as a finance lease embedded within the contract. This requires the Council to recognise the vehicle assets as belonging to it, alongside a liability. The liability is effectively repaid through the contract sums over the seven years of the contract.

The extended definition of borrowing in advance of need now covers borrowing for capital investments where they are acquired purely to generate profit. The change to the PWLB rules also means that this borrowing cannot be accessed if there is any capital spend that is primarily to generate income, even if that spend was intended to be financed from reserves. The capital programme item in respect of housing had previously encompassed the purchase of existing housing. This has been in the capital programme for a few years and is funded from capital receipts, so would not breach the “borrowing in advance of need” rules. However, it could be considered to be in breach of the PWLB borrowing restrictions. The focus of this funding has therefore been changed to cover the development and conversion of new housing. As detailed in the property development and acquisition strategy the primary purpose of the £20m investment is for the

purposes of the Council’s functions or the benefit, improvement or development of the area. Any surplus is necessary to justify this investment but is not the primary purpose.

Minimum Revenue Provision

When the Council has a Capital Financing Requirement (CFR) it is required to make a charge to the General Fund (revenue budget) called a Minimum Revenue Provision (MRP). Subject to guidelines, the Council sets its MRP policy, which is detailed below:

Minimum Revenue Provision:

The Council is required to have a Minimum Revenue Provision (MRP) policy, and when required make charges to revenue in accordance with that policy.

The Council will use the asset life method. The MRP amount will be spread over the estimated life of the assets, in accordance with the regulations. The Council will apply one of the two approaches below based on the project(s) that the borrowing is used for and the benefits derived from the project(s).

- Equal instalments – The principal repayment made is the same each year.
- Or
- Annuity – the principal repayments increase over the life of the asset. This has the advantage of linking MRP to the benefits arising from capital expenditure, where these benefits are expected to increase over the life of the asset.

The Council will have a need to borrow in 2021/22 if the Capital programme is fully spent and will therefore need to apply a Minimum Revenue Provision (MRP). The current capital programme is a combination of spend on service provision and investments that should generate a consistent return over time. Therefore, it is considered appropriate to adopt an equal instalment MRP policy. This can be reviewed in future if the Council ever looked at an investment with a return profile that increased over the life of the asset.

There is a prudential indicator that compares the net cost of financing (i.e. borrowing costs less income generated from investments) with the net revenue budget of the Council. This will be looked at later in this document after considering investments and their forecast returns. However, the indicator below considers the cost of borrowing as a % of the net revenue budget of the Council.

Treasury Indicator 7: Cost of borrowing (interest and MRP) as a % of the net revenue budget 2021/22 to 2025/26

Year	Estimated cost of borrowing (£m)	Forecast net revenue budget (£m)	Estimated cost of borrowing as a % of net revenue budget (%)
2021/22	0.276	15.755	1.75
2022/23	0.275	15.499	1.78
2023/24	0.323	15.448	2.09
2024/25	0.619	15.458	4.00
2025/26	0.674	15.287	4.41

Part 5- Investment Strategy

Based on the assumptions above the following available investment balances are assumed. This includes a forecast of revenue reserves, capital reserves, capital financing requirement and external borrowing (table 15).

Table 15

Balances	Brought forward (at 31/3/20)	Forecast balance at year end (£000)					
		2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
Revenue balances (including MRP added back)	23,768	22,472	27,613	26,385	26,690	33,191	30,398
Capital Receipts	1,941	213	319	4,164	121	17	17
Capital Grants Unapplied	938	938	225	225	225	225	225
Add: Long-term liabilities ¹	2,125	1,622	1,119	616	113	0	0
Less: Capital Financing Requirement	-5,594	-4,704	5,098	5,094	6,194	12,912	14,136
Less: Borrowing repayments	17	18	18	282	282	339	671
Total forecast of available for investment	34,349	29,931	24,160	26,014	20,673	20,182	15,833

1 The net position of money owed by the Council or to the Council can lead to increased or decreased cash available for investment. The short-term position is assumed to be net zero. Long-term liabilities are included as the expenditure has been assumed to have been incurred, but the cash has not yet been paid. This primarily relates to the waste vehicles.

The Council needs to consider the following in determining how long it will invest any surplus cash for:

- The period that any particular cash balance is available for. If a balance is expected to be available over a long period then it is possible to invest it over a long period.
- How much might be required to cover short term variations in cash. For example, it could be forecast that the cash at the start and end of the month will be the same. But if there is a need to pay out half that cash at the start of the month before getting an equivalent amount just before the end, then there is a need to plan.
- The risk of investing for longer periods as it increases the chance that the counterparty could have financial problems and therefore not pay back the principal invested and/ or the interest due.
- The risk of investing for longer periods as it could lead to a lost opportunity. If the investment is at a fixed rate and then there is a general rise in rates available (e.g. due to an unexpected Bank of England base rate rise) then it would not be possible to take advantage of the new improved rates until the investment matures.

Before considering where the Council will invest any surplus cash in treasury investments, it firstly needs to consider any loans that it may want to make for other purposes. A local authority can choose to make loans to local enterprises, local charities, wholly owned companies and joint ventures. These loans can relate to service provision or to promote local economic growth. These loans may not seem prudent when considered purely in relation to security and liquidity. Table 16 details current and planned loans and shows the reasons for these loans, how their value is proportionate, the risk of loss and credit control arrangements that are in place.

Table 16

Loan	Amount	Reason for Loan	Proportionality of value	Expected Credit Loss model and credit control
Building Control	Currently £107k, provision for it to increase up to £172k	To support the formation of the company. The Council is also a shareholder in the company, owning 1/7 th of the shares.	Insignificant in the context of overall cash balances. Around 0.4% of total investments.	Regular monitoring of financial forecasts and business plans. The continuation of the company to provide Building Control services is more significant than the value of the loan.
Wholly owned Property Company	Tbc, up to £3m	To provide the company with finances to purchase and develop property assets. These properties will then be let or sold to generate income and profit. It is also possible that any investment could be in the form of equity.	Based on investment limits in table 17 below, it could be the equivalent of one investment in a bank or building society. Also included within treasury limits to ensure diversification in relation to residential property.	Any loan could be secured against the property assets of the company. An equity investment would provide less security and increase expected credit loss. However, it may enable the company to be more profitable, and therefore increase returns. Expected credit loss would be looked at in more detail in advance of any investment being granted and linked to the planned use of those funds.

When the Council invests its surplus cash, it seeks to find reliable counterparties to ensure that the amount invested (and the interest earned) is returned. The Council has decided that it is prepared to take on a higher level of risk than recommended by its treasury advisers in relation to unrated Building Societies and the duration of its investments. This risk is mitigated by reviewing published information in relation to unrated Building Societies (i.e. "Pillar 3" reports and reports by accountancy firm KPMG). Whilst the Council has in the past been fairly highly exposed to Building Societies, it has rebalanced this exposure during the last couple of years to make greater use of other investment types.

The following criteria are used to determine the list of counterparties:

- UK Local Authorities- as they are able to raise additional funds from taxation
- UK Government- Debt Management Office provides highly liquid investments at the lowest risk as backed by the UK Government
- UK Banks and Building Societies with a Fitch Credit rating of BBB (long-term)/ F3 (short-term) or greater- as they have been subject to UK 'stress tests' and also have a high credit rating
- Part-nationalised UK banks- as they have been subject to UK 'stress tests' and the UK government has an increased interest in not allowing them to fail.
- The Council's own banker (Lloyds) that it uses for transactional purposes. Although if its credit rating falls below BBB then any balances will be kept to a minimum (i.e. for cashflow purposes only)
- Non-UK banks with a UK subsidiary that have a Fitch Credit rating of BBB (long-term)/ F3 (short-term) or greater, and are subject to the same stress tests as UK banks
- Non-UK banks where the Country has a AAA rating and the institution has a AA-and above rating.
- Unrated UK Building Societies- as organisations have to pay to obtain a rating; most Building Societies do not get one. They do produce annual reports known as Pillar 3 reports, and these will be used to assess their credit worthiness. Furthermore the Council will only invest in Building Societies that have assets of at least £300m, which limits the potential exposure.
- Money Market funds that are AAA rated.
- Property funds that hold property within the UK.
- Ultra Short Dated Bond Funds- These funds invest in fixed income instruments with very short maturity dates, usually up to one year. This generally provides better returns than money market funds. Whilst this does introduce some capital risk, this is minimised by the short-term nature of such investments. Where AAA rated.
- Multi-asset Funds- These funds invest in a variety of assets including equities, bonds and cash and are can be spread over a broad range of strategies, styles, sectors and regions. Risk is diversified by the spread of investments held.

All investments will be denominated in Sterling.

The Council will seek to appropriately diversify its investments across a range of types and counterparties. This means that if there were any security or liquidity issues with a particular type of investment or counterparty, the Council would still have access to the majority of its funds. The limits are initially based on a percentage of total funds but are converted to actual values to make the administration of investments more efficient. The values are calculated by applying the percentages to the expected balance at the end of the year (2021/22)* and then rounded up to the nearest £1m. If these limits are set too low then it limits the investment opportunities available and also increases the administration as there is then a need to find more places to invest available funds. The limits are shown in table 17 below.

* This is the balance taken from table 15 above of £24.2m but adjusted for the £3m potential capital investment in residential investment. This is included as the £3m investment and is included within the limits to ensure diversification.

Table 17

Investment Type	Maximum amount in that type of investment (£m)	Maximum amount in group (£m)	Maximum amount with any individual counterparty (£m)	Rationale and details
Debt Management Office (UK Government)	No limit			Short-term investment with UK Government that is therefore the lowest possible risk
UK Local Authorities	No limit	n/a	5	15% with any one counterparty, no limit on total with Local Authorities due to tax raising powers
UK Banks and UK subsidiaries of foreign banks that are subject to the same stress tests as UK banks (excluding Lloyds current account)- includes Deposits and Certificates of Deposit	21	5	3	Rating F3 or above (short-term) or BBB or above (long-term) and part nationalised banks. 10% with any one counterparty, 15% with institutions in the same banking group, 75% with banks in total
Lloyds Current Account		n/a	5	Used for cashflow purposes
Non-UK banks- includes deposits and Certificates of deposit		7	3	AAA Country rating and AA-and above institution rating. Maximum of 10% with any one counterparty. Maximum of 25% in non-UK banks. 75% in banks in total.
UK Building Societies- assets of £300m to £1bn	n/a	17	2	Review of Pillar 3 reports and KPMG report on comparative profits. 10% with any one counterparty subject to maximum of £2m. Maximum of 60% with UK Building Societies and Property Funds combined.
UK Building Societies- assets of over £1bn			3	As above, but £3million
Rated UK Building Societies			3	Rating F3 or above (short-term) or BBB or above (long-term). 10% with any one counterparty.
Residential Property Investment			3	N/A
UK Property Funds	2		2	Due to long-term nature of investment 10% of 2025/26 year end cash balance to be invested in any one fund or combination of funds. No durational limits.
Money Market Funds	7	n/a	3	AAA rated. Maximum of 25% in MMFs and 10% with any one fund.

Ultra-Short Dated Bond Funds	3		1	AAA rated. Maximum of 10% in USDBFs and £1M with any one fund.
UK Multi-Asset Funds	2		2	Due to long-term nature of investment 10% of 2025/26 year end cash balance to be invested in any one fund or combination of funds. No durational limits.

The Council will primarily limit its liquidity risk by only investing money until it thinks it will next need it. On top of this it will also have a general limit on investments that are greater than 1 year (365 days). This limit is based on 40% of total investments but is again reflected as an absolute value of **£11m**, which is based on 40% of the expected level of investments at the end of the year. Investments with a set term of greater than 2 years will be subject to approval by the Chief Finance Officer, which will include a consideration of how much the investment will be as a percentage of total funds at the date it matures. It will be ensured that this is less than 40% of the estimated balance. No investment term will exceed 5 years.

Investment funds (money market funds, multi-asset funds and property funds) do not have a set term and funds can be requested to be withdrawn at any time. Investment balances will be kept under review to ensure that they do not exceed the maximum amount set by this or subsequent treasury strategies. However, there is no time limit on the period that funds can be held invested for. For property funds there are both up-front set up and exit costs. Furthermore, the capital value of these funds also fluctuates over time. So, whilst in general it is possible to exit these funds at any time, there are likely to be more optimum times to do so. Therefore, it is expected that the period of investment could exceed 5 years. For multi-asset funds, the capital value of these funds also fluctuates over time. So, whilst in general it is possible to exit these funds at any time, there are likely to be more optimum times to do so. Therefore, it is expected that the period of investment could exceed 5 years

Within the investment market, the opportunity for 'green' investments is starting to emerge. These are offering returns that are similar to, or the same as, non-green alternatives for the same level of risk. Subject to these investments being compliant with other aspects of the treasury strategy, then these investments will be prioritised over non-green alternatives.

In general, the Council will access treasury deals directly, rather than using a cash manager. In the current market, the Council is able to get the same (or very similar) rates as a cash manager and this therefore avoids the fees charged by the cash manager. However, the Council will use a cash manager (Tradition) where it provides access to a better investment rate after accounting for the fees. As the actual investment will be with a counterparty, the Council will not set any limits on the number or value of deals that are accessed via Tradition.

Where the Council makes use of credit ratings these will be assessed immediately prior to placing an investment. The Council then receives alerts whenever ratings change and will monitor these alerts to see if an investment has fallen below the minimum criteria. For fixed term investments, it generally will not be possible to do anything in relation to a rating change. Although for a significant drop, enquiries will be made as to the exit costs involved. If these are not significant then the Council will end the investment early. For open term investments, the Council will seek to disinvest, although it will consider any exit costs.

The Council maintains a treasury risk on its risk register.

There is some link between the interest rates that the Council can expect to achieve on its investments and the Bank of England base rate. Our treasury advisors (Link) have provided the following forecasts of base rates over the next 3years. Using this and the investment limits above, we have estimated an average interest rate that the Council will achieve on its investments in each year.

Table 18

Year	Forecast of Bank of England Base Rate as at end of the year (%)	Forecast of average interest earned on investments (%)
2020/21	0.1	0.1
2021/22	0.1	0.1
2022/23	0.1	0.1
2023/24	0.1	0.1

Combining these average interest rates with expected balances, gives a forecast of the interest that will be earned in each year. However, the Council is planning on investing in longer term Property and Multi-asset funds. By taking on greater liquidity risk, a higher medium-term return could be expected. The table below makes an estimate of £4m invested in these funds and a return of 2%. This will be accompanied by a financial risk as returns are very uncertain, particularly on a short-term basis.

Table 19

	2021/22	2022/23	2023/24	2024/25	2025/26
Forecast of average balance available for investment (£m)- short to medium term	23.2	22.0	16.7	16.2	11.9 Forecast
Forecast of average interest earned on investments (%)- short to medium term	0.1	0.1	0.1	0.1	0.1
Forecast of balance available for investment (£m)- longer-term	4	4	4	4	4
Forecast of average interest earned on investments (%)- longer-term	2	2	2	2	2
Forecast of interest earned (£m)*	0.103	0.102	0.097	0.096	0.092
Current interest assumed in the revenue budget.	0.167	0.167	0.167	0.167	0.167

*Due to current economic uncertainty Interest estimates in the revenue budget are higher than those forecast from multiplying the average balance by forecast interest rates. These will be reassessed each year. For 2021/22 it will be necessary to revise the budget down to £104k (a pressure of £63k.

The Council is required to set a prudential indicator that estimates financing costs (cost of borrowing less income from investments) as a percentage of its net revenue budget.

Prudential Indicator 8: Forecast of Financing Costs as a percentage of net revenue budget

Year	Cost of borrowing £m	Less: Forecast of interest earned £m	Net Financing costs £m	Net Revenue Budget £m	Financing Costs as a % of Net Revenue Budget £m
2020/21	0.041	0.185	-0.144	15.889	-0.906
2021/22	0.276	0.103	0.173	15.755	1.098
2022/23	0.275	0.102	0.173	15.499	1.117
2023/24	0.323	0.097	0.226	15.448	1.463
2024/25	0.619	0.096	0.523	15.458	3.382
2025/26	0.674	0.092	0.582	15.287	3.808

Part 6- Overall Risk Considerations

The risk exposures for each of the elements of this strategy are generally independent, and therefore can be considered in isolation.

The Council's investments assets generally comprise of ground leases on commercial properties that are all within North Hertfordshire. The main exception to this is the freehold of the Churchgate Shopping Centre in Hitchin. A property fund generally invests in building (and land) assets that provide higher yields, and also diversifies across the United Kingdom. They also currently tend to focus on industrial, warehouses and office buildings. This means that there is limited cross-over in risk exposure, and before investing in a property fund (current investments are zero) the Council would review the current investments of the selected fund. Furthermore, this strategy limits any investment in a property fund to a maximum of £3m.

The capital programme includes an allocation of £3m for investments in market housing within North Hertfordshire. This will expose the Council to a similar risk to Building Society investments, in that they will both be influenced by the UK housing market. This is part of the rationale for reducing the amounts that can be invested in Building Societies. In general, Building Societies will have a much more diversified risk exposure e.g. by location and number of properties.

Part 7- Glossary

A number of definitions are included in the strategy when they are first referenced. These are not duplicated here. This part provides list of other terms used in this report, as well as those used in the statutory guidance.

Borrowing- a written or oral agreement where the Council temporarily receives cash from a third party (e.g. a Bank, the Public Works Loan Board or another Local Authority) and promises to return it according to the terms of the agreement, normally with interest.

Investment: This covers all of the financial assets of the Council as well as other non-financial assets that the Council holds primarily or partially to generate a profit; for example, investment property portfolios. This will include investments that are not managed as part of normal treasury management processes or under treasury management delegations. Furthermore, it also covers loans made by the Council to one of its wholly-owned companies or associates, to a joint venture, or to a third party. The term does not include pension funds or trust fund investments, which are subject to separate regulatory regimes.

Within this strategy, the term investment is used in the following contexts:

- Capital investment- expenditure to acquire or improve a capital asset.
- Investment properties- assets that are held for the purpose of generating an income.
- Cash/ treasury investments- the cash that the Council has, which is made up of revenue reserves, capital reserves and the effects of cashflow timings. These amounts are invested to manage the risks of holding cash and to generate investment income.

Financial investments: These are made up of Cash/ Treasury investments and loans. This term is defined within the statutory guidance (as specified investments, loans and unspecified investments) but has not been directly used in this strategy. Part 5 of the Strategy is focused on these investments.

Specified Investment: These are essentially short-term Cash/ Treasury investments. To be a specified investment, it needs to meet the following criteria:

- The investment is denominated in sterling and any payments or repayments in the respect of the investment are payable only in sterling.
- The investment is not a long term investment. This means that the local authority has contractual right to repayment within 12 months, either because that is the expiry term of the investment or through a non-conditional option.
- It is not capital expenditure.
- The investment is considered to be high quality or is with the UK Government, another Local Authority or a Parish/ Community Council.

High Quality investment: These are investments (specified and non-specified) which are assessed on the priority basis of security, liquidity and yield. Where relevant they make use of relevant additional information, such as credit ratings. The investments set out in part 5 are considered by the Council to be 'high quality'.

- The investment is denominated in sterling and any payments or repayments in the respect of the investment are payable only in sterling.
- The investment is a long term investment. This means that the local authority has contractual right to repayment in greater than 12 months.
- It is not capital expenditure.

- The investment is considered to be high quality or is with the UK Government, another Local Authority or a Parish/ Community Council.

Unspecified investment: In the statutory guidance, these are financial assets that are not specified investments or loans. This creates a circular definition. The Council considers that they meet the following definition:

Loan: a written or oral agreement where the Council temporarily transfers cash to a third party, joint venture, subsidiary or associate who promises to return it according to the terms of the agreement, normally with interest. This definition does not include a loan to another local authority, which is classified as a specified investment. The Council will meet the following conditions when providing such loans:

- Total financial exposure to these type of loans is proportionate;
- An allowed “expected credit loss” model has been used as set out in Accounting Standards
- Appropriate credit control arrangements are in place to recover overdue repayments; and
- The total level of loans by type is in accordance with the limits set out in this Strategy.
