| 1. Name of activity: | Acquisition of Unit 1, City Park, Letchworth, to create a new museum storage facility. | | | | | | |
| 2. Main purpose of activity: | To create a new museum storage facility. | | | | | | |
| 3. List the information, data or evidence used in this assessment: | Previous committee reports and assessments, knowledge of the existing building and location, staff knowledge. | | | | | | |
| 4. Assessment | | | | | | | |
| Characteristics | Neutral (x) | Negative (x) | Positive (x) | Describe the person you are assessing the impact on, including identifying: community member or employee, details of the characteristic if relevant, e.g. mobility problems/particular religion and why and how they might be negatively or positively affected. Negative: What are the risks? | | | |
| | | | | Positive: What are the benefits? | | | |
| | | | | Negative | | | |
| Community considerations (i.e. applying across communities or associated with rural living or Human Rights) | х | | | The museums storage facility must be located somewhere and this will be easier to access from some locations in the district than others. That said, Letchworth is fairly central to the geographical remit of the museum service. Positive As the Museum is based in Hitchin, it is advantageous to have the storage facility in the other main urban conurbation of Letchworth so that Cultural Services have a presence in both of the main population centres. | | | |
| | | | | Negative | | | |
| | | | Х | | | | |
| | | | | Positive | | | |
| A person living with a disability | | | | The current store is not accessible, whereas the new store will have level access and a passenger lift to other floors, meaning anyone working for the service or visiting the stores should find improved access compared to the current position. | | | |
| | | | | Negative | | | |
| A person of a particular race | Х | | | Positive | | | |
| | | | | | | | |
| A person of a gay, lesbian or bisexual sexual orientation | х | | | Negative | | | |

| A person of a particular age | | | | | | | | | |
| | | | | Positive | | | | | |
| | Х | Whilst old age does not have a direct relationship with access needs, there is a correlation and the greater ease of access at a new store should be a positive over the current setup of the museum storage facility. In addition, those with children or groups visiting with children should find a preferable layout with less hazards a more suitable destination to visit as a family or as a youth group for young children. | | | | | | | |
