

Appendix F1 - Supplementary comments

Contained in **Appendix F – Responsible Authorities - Comments** there is chain of emails dated 20 December 2024 between James Beeson, Senior Environmental Health Officer, Public Health and Gareth Gwynne-Smith, Designated Premises Supervisor of Bygrave Plantation.

I wish to clarify that although the conditions have been agreed by both parties, should the Variation application be refused in totality, the conditions would not be applied.

If the Variation application is approved, or if this part of it is approved, most of these conditions are on the licence as they have been combined with police conditions relating to the EMP, and it would only be the missing conditions that would be added to the premises licence.
