9	Annual Investment Strategy	12

1 Background

1.1 Treasury Management

The Authority operates a balanced revenue budget, which broadly means cash raised during the year will meet its cash expenditure. Part of the treasury management operations ensure this cash flow is adequately planned, with surplus monies being invested in low-risk counterparties, providing adequate liquidity initially before considering optimising investment return.

The second main function of the treasury management service is the funding of the Authority's capital plans. These capital plans provide a guide to the borrowing need of the Authority, essentially the longer-term cash flow planning to ensure the Authority can meet its capital spending operations. This management of longer-term cash may involve arranging long or short-term loans, or using longer term cash flow surpluses, and on occasion any debt previously drawn may be restructured to meet Authority risk or cost objectives.

Accordingly, treasury management is defined as:

"The management of the local authority's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

1.2 CIPFA Consultation on Treasury Management and Prudential Codes of Practice

The Chartered Institute of Public Finance and Accountancy is currently consulting local authorities in respect of potential changes to the Codes. At this juncture, the focus seems to primarily be on the Non-Treasury investment aspects of local authority activity. Officers will provide an update on any material developments/changes in due course.

2 Introduction

This report has been written in accordance with the requirements of the Chartered Institute of Public Finance and Accountancy's (CIPFA) Code of Practice on Treasury Management (revised 2021).

The primary requirements of the Code are as follows:

1. Creation and maintenance of a Treasury Management Policy Statement which sets out the policies and objectives of the Authority's treasury management activities.
2. Creation and maintenance of Treasury Management Practices which set out the manner in which the Authority will seek to achieve those policies and objectives.
3. Receipt by the full Council of an annual Treasury Management Strategy Statement - including the Annual Investment Strategy and Minimum Revenue Provision Policy, a Mid-year Review Report and an Annual Report, (stewardship report), covering activities during the previous year. (Quarterly reports are also required for the periods ending April to June and October to December but may be assigned to a designated committee or panel as deemed appropriate to meet the Treasury Management governance and scrutiny aspects of the Authority.)
4. Delegation by the Authority of responsibilities for implementing and monitoring treasury management policies and practices and for the execution and administration of treasury management decisions.
5. Delegation by the Authority of the role of scrutiny of treasury management strategy and policies to a specific named body. For this Authority, the delegated body is Finance, Audit and Risk Committee.

This mid-year report has been prepared in compliance with CIPFA's Code of Practice on Treasury Management, and covers the following:

- An economic update for the first half of the 2025/26 financial year;
- A review of the Treasury Management Strategy Statement and Annual Investment Strategy;
- The Authority's capital expenditure, as set out in the Capital Strategy, and prudential indicators;
- A review of the Authority's investment portfolio for 2025/26;
- A review of the Authority's borrowing strategy for 2025/26;
- A review of any debt rescheduling undertaken during 2025/26;
- A review of compliance with Treasury and Prudential Limits for 2025/26.

3 Economics and Interest Rates

3.1 Economics Update

- The first half of 2025/26 saw:
 - A 0.3% pick up in GDP for the period April to June 2025. More recently, the economy flatlined in July, with higher taxes for businesses restraining growth.
 - The 3m/yy rate of average earnings growth excluding bonuses has fallen from 5.5% to 4.8% in July.
 - CPI inflation has ebbed and flowed but finished September at 3.8%, whilst core inflation eased to 3.6%.
 - The Bank of England cut interest rates from 4.50% to 4.25% in May, and then to 4% in August.
 - The 10-year gilt yield fluctuated between 4.4% and 4.8%, ending the half year at 4.70%.
- From a GDP perspective, the financial year got off to a bumpy start with the 0.3% m/m fall in real GDP in April as front-running of US tariffs in Q1 (when GDP grew 0.7% on the quarter) weighed on activity. Despite the underlying reasons for the drop, it was still the first fall since October 2024 and the largest fall since October 2023. However, the economy surprised to the upside in May and June so that quarterly growth ended up 0.3% q/q. Nonetheless, the 0.0% m/m change in real GDP in July will have caused some concern, with the hikes in taxes for businesses that took place in April this year undoubtedly playing a part in restraining growth. The weak overseas environment is also likely to have contributed to the 1.3% m/m fall in manufacturing output in July. That was the second large fall in three months and left the 3m/3m rate at a 20-month low of -1.1%. The 0.1% m/m rise in services output kept its 3m/3m rate at 0.4%, supported by stronger output in the health and arts/entertainment sectors. Looking ahead, ongoing speculation about further tax rises in the Autumn Budget on 26 November will remain a drag on GDP growth for a while yet. GDP growth for 2025 is forecast by Capital Economics to be 1.3%.
- Sticking with future economic sentiment, the composite Purchasing Manager Index for the UK fell from 53.5 in August to 51.0 in September. The decline was mostly driven by a fall in the services PMI, which declined from 54.2 to 51.9. The manufacturing PMI output balance also fell, from 49.3 to 45.4. That was due to both weak overseas demand (the new exports orders balance fell for the fourth month in a row) and the cyber-attack-induced shutdown at Jaguar Land Rover since 1 September reducing car production across the automotive supply chain. The PMIs suggest tepid growth is the best that can be expected when the Q3 GDP numbers are released.
- Turning to retail sales, and the 0.5% m/m rise in volumes in August was the third such rise in a row and was driven by gains in all the major categories except fuel sales, which fell by 2.0% m/m. Sales may have been supported by the warmer-than-usual weather. If sales were just flat in September, then in Q3 sales volumes would be up 0.7% q/q compared to the 0.2% q/q gain in Q2.
- With the November Budget edging nearer, the public finances position looks weak. Public net sector borrowing of £18.0bn in August means that after five months of the financial year, borrowing is already £11.4bn higher than the OBR forecast at the Spring Statement in March. The overshoot in the Chancellor's chosen fiscal mandate of the current budget is even greater with a cumulative deficit of £15.3bn. All this was due to both current receipts in August being lower than the OBR forecast (by £1.8bn) and current expenditure being higher (by £1.0bn). Over the first five months of the financial year, current receipts have fallen short by a total of £6.1bn (partly due to lower-than-expected self-assessment income tax) and current expenditure has overshot by a total of £3.7bn (partly due to social benefits and departmental spending). Furthermore, what very much matters now is the OBR forecasts and their impact on the current budget in 2029/30, which is when the Chancellor's fiscal mandate bites. As a general guide, Capital Economics forecasts a deficit of about £18bn, meaning the Chancellor will have to raise £28bn, mostly through higher taxes, if she wants to keep her buffer against her rule of £10bn.

- The weakening in the jobs market looked clear in the spring. May's 109,000 m/m fall in the PAYE measure of employment was the largest decline (barring the pandemic) since the data began and the seventh in as many months. The monthly change was revised lower in five of the previous seven months too, with April's 33,000 fall revised down to a 55,000 drop. More recently, however, the monthly change was revised higher in seven of the previous nine months by a total of 22,000. So instead of falling by 165,000 in total since October, payroll employment is now thought to have declined by a smaller 153,000. Even so, payroll employment has still fallen in nine of the ten months since the Chancellor announced the rises in National Insurance Contributions (NICs) for employers and the minimum wage in the October Budget. The number of job vacancies in the three months to August stood at 728,000. Vacancies have now fallen by approximately 47% since its peak in April 2022. All this suggests the labour market continues to loosen, albeit at a declining pace.
- A looser labour market is driving softer wage pressures. The 3m/yy rate of average earnings growth excluding bonuses has fallen from 5.5% in April to 4.8% in July. The rate for the private sector slipped from 5.5% to 4.7%, putting it on track to be in line with the Bank of England's Q3 forecast (4.6% for September).
- CPI inflation fell slightly from 3.5% in April to 3.4% in May, and services inflation dropped from 5.4% to 4.7%, whilst core inflation also softened from 3.8% to 3.5%. More recently, though, inflation pressures have resurfaced, although the recent upward march in CPI inflation did pause for breath in August, with CPI inflation staying at 3.8%. Core inflation eased once more too, from 3.8% to 3.6%, and services inflation dipped from 5.0% to 4.7%. So, we finish the half year in a similar position to where we started, although with food inflation rising to an 18-month high of 5.1% and households' expectations for inflation standing at a six year high, a further loosening in the labour market and weaker wage growth may be a requisite to UK inflation coming in below 2.0% by 2027.
- An ever-present issue throughout the past six months has been the pressure being exerted on medium and longer dated gilt yields. The yield on the 10-year gilt moved sideways in the second quarter of 2025, rising from 4.4% in early April to 4.8% in mid-April following wider global bond market volatility stemming from the "Liberation Day" tariff announcement, and then easing back as trade tensions began to de-escalate. By the end of April, the 10-year gilt yield had returned to 4.4%. In May, concerns about stickier inflation and shifting expectations about the path for interest rates led to another rise, with the 10-year gilt yield fluctuating between 4.6% and 4.75% for most of May. Thereafter, as trade tensions continued to ease and markets increasingly began to price in looser monetary policy, the 10-year yield edged lower, and ended Q2 at 4.50%.
- More recently, the yield on the 10-year gilt rose from 4.46% to 4.60% in early July as rolled-back spending cuts and uncertainty over Chancellor Reeves' future raised fiscal concerns. Although the spike proved short lived, it highlighted the UK's fragile fiscal position. In an era of high debt, high interest rates and low GDP growth, the markets are now more sensitive to fiscal risks than before the pandemic. During August, long-dated gilts underwent a particularly pronounced sell-off, climbing 22 basis points and reaching a 27-year high of 5.6% by the end of the month. While yields have since eased back, the market sell-off was driven by investor concerns over growing supply-demand imbalances, stemming from unease over the lack of fiscal consolidation and reduced demand from traditional long-dated bond purchasers like pension funds. For 10-year gilts, by late September, sticky inflation, resilient activity data and a hawkish Bank of England have kept yields elevated over 4.70%.
- The FTSE 100 fell sharply following the "Liberation Day" tariff announcement, dropping by more than 10% in the first week of April - from 8,634 on 1 April to 7,702 on 7 April. However, the de-escalation of the trade war coupled with strong corporate earnings led to a rapid rebound starting in late April. As a result, the FTSE 100 closed Q2 at 8,761, around 2% higher than its value at the end of Q1 and more than 7% above its level at the start of 2025. Since then, the FTSE 100 has enjoyed a further 4% rise in July, its strongest monthly gain since January and outperforming the S&P 500. Strong corporate earnings and progress in trade talks (US-EU, UK-India) lifted share prices and the index hit a record 9,321 in mid-August, driven by hopes of peace in Ukraine and dovish signals from Fed Chair Powell. September proved more volatile and the FTSE 100 closed Q3 at 9,350, 7% higher than at the end of Q1 and 14% higher since the start of 2025. Future performance will likely be impacted by the extent to which investors' global risk appetite remains intact, Fed rate cuts, resilience in the US economy, and AI optimism. A weaker pound will also boost the index as it inflates overseas earnings.

MPC meetings: 8 May, 19 June, 7 August, 18 September 2025

- There were four Monetary Policy Committee (MPC) meetings in the first half of the financial year. In May, the Committee cut Bank Rate from 4.50% to 4.25%, while in June policy was left unchanged. In June's vote, three MPC members (Dhingra, Ramsden and Taylor) voted for an immediate cut to 4.00%, citing loosening labour market conditions. The other six members were more cautious, as they highlighted the need to monitor for "signs of weak demand", "supply-side constraints" and higher "inflation expectations", mainly from rising food prices. By repeating the well-used phrase "gradual and careful", the MPC continued to suggest that rates would be reduced further.
- In August, a further rate cut was implemented. However, a 5-4 split vote for a rate cut to 4% laid bare the different views within the Monetary Policy Committee, with the accompanying commentary noting the decision was "finely balanced" and reiterating that future rate cuts would be undertaken "gradually and carefully". Ultimately, Governor Bailey was the casting vote for a rate cut but with the CPI measure of inflation expected to reach at least 4% later this year, the MPC will be wary of making any further rate cuts until inflation begins its slow downwards trajectory back towards 2%.
- The Bank of England does not anticipate CPI getting to 2% until early 2027, and with wages still rising by just below 5%, it was no surprise that the September meeting saw the MPC vote 7-2 for keeping rates at 4% (Dhingra and Taylor voted for a further 25bps reduction).
- The Bank also took the opportunity to announce that they would only shrink its balance sheet by £70bn over the next 12 months, rather than £100bn. The repetition of the phrase that "a gradual and careful" approach to rate cuts is appropriate suggests the Bank still thinks interest rates will fall further but possibly not until February, which aligns with both our own view and that of the prevailing market sentiment.

3.2 Interest Rate Forecasts

The Authority has appointed MUFG Corporate Markets as its treasury advisors and part of their service is to assist the Authority to formulate a view on interest rates. The PWLB rate forecasts below are based on the Certainty Rate (the standard rate minus 20bps) which has been accessible to most authorities since 1 November 2012.

MUFG Corporate Markets' latest forecast on 11 August sets out a view that short, medium and long-dated interest rates will fall back over the next year or two, although there are upside risks in respect of the stickiness of inflation and a continuing tight labour market, as well as the size of gilt issuance.

MUFG Corporate Markets Interest Rate View 11.08.25													
	Sep-25	Dec-25	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27	Mar-28	Jun-28	Sep-28

4 Treasury Management Strategy Statement and Annual Investment Strategy Update

The Treasury Management Strategy Statement, (TMSS), for 2025/26 was approved by this Authority on 27/02/2025

- There are no policy changes to the TMSS; the details in this report update the position in the light of the updated economic position and budgetary changes already approved.

5 The Authority's Capital Position (Prudential Indicators)

This part of the report is structured to update:

- The Authority's capital expenditure plans;
- How these plans are being financed;
- The impact of the changes in the capital expenditure plans on the prudential indicators and the underlying need to borrow; and
- Compliance with the limits in place for borrowing activity.

5.1 Prudential Indicator for Capital Expenditure

This table shows the revised estimates for capital expenditure and the current spend as at 30 September.

Capital Expenditure by Service	2025/26 Working Estimate £'000	Current Position £'000	2025/26 Revised Estimate £'000
Asset Management	1,591	42	1,291
CCTV	45	0	40
Community Services	5	0	5
Computer Software and Equipment	1,651	808	1,615
Corporate Items	91	8	91
Growth Fund Projects	713	0	713
Leisure Facilities	12,847	1,948	13,291
Museum & Arts	2,258	1,100	1,658
Parking	976	-127	325
Renovation & Reinstatement Grant Expenditure	546	4	345
S106 projects	332	161	332
Waste	6,660	4,028	6,660
Total capital expenditure	27,624	7,972	26,366

5.2 Changes to the Financing of the Capital Programme

The table below draws together the main strategy elements of the capital expenditure plans (above), highlighting the original supported and unsupported elements of the capital programme, and the expected financing arrangements of this capital expenditure. The borrowing element of the table increases the underlying indebtedness of the Authority by way of the Capital Financing Requirement (CFR), although this will be reduced in part by revenue charges for the repayment of debt (the Minimum Revenue Provision). This borrowing need may also be supplemented by maturing debt and other treasury requirements.

Capital Expenditure	2025/26 Original Estimate £m	Current Position £m	2025/26 Revised Estimate £m
Total capital expenditure	27,624	7,972	26,366
Financed by:			
Capital receipts and Set Aside Receipts	1,236	-245	1,273
Other third party grants and contributions	2,702	2,007	2,793
S106	360	161	360
Revenue	3,230	2,980	3,230
Total financing	7,528	4,903	7,656
Borrowing requirement	20,069	3,069	18,710

5.3 Changes to the Prudential Indicators for the Capital Financing Requirement (CFR), External Debt and the Operational Boundary

The table below shows the CFR, which is the underlying need to incur borrowing for a capital purpose. It also shows the expected debt position over the period, which is termed the Operational Boundary.

Prudential Indicator – the Operational Boundary for external debt

	2025/26 Original Estimate £m	Current Position £m	2025/26 Revised Estimate £m
Prudential Indicator – Capital Financing Requirement			
Total CFR	20.585	2.002	18.705
Prudential Indicator – the Operational Boundary for external debt			
Internal Borrowing	20.586	2.594	18.824
Other long-term liabilities	0.100	0.100	0.100
Total External Debt (year end position)	6.289	0.305	6.289

5.4 Limits to Borrowing Activity

The first key control over the treasury activity is a prudential indicator to ensure that over the medium term, net borrowing (borrowings less investments) will only be for a capital purpose. **Gross external borrowing** should not, except in the short term, exceed the total of CFR in the preceding year plus the estimates of any additional CFR for 2025/26 and next two financial years. This allows some flexibility for limited early borrowing for future years. The Authority has approved a policy for borrowing in advance of need which will be adhered to if this proves prudent.

A further prudential indicator controls the overall level of borrowing. This is **the Authorised Limit** which represents the limit beyond which borrowing is prohibited and needs to be set and revised by Members. It reflects the level of borrowing which, while not desired, could be afforded in the short term, but is not sustainable in the longer term. It is the expected maximum borrowing need with some headroom for unexpected movements. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003 (England & Wales).

Limits for external debt	2025/26 Original Indicator £m	Current Position	2025/26 Revised Indicator £m
Authorised Limit	13.0	0.315	13.0
Operational Boundry	8.0	0.315	8.0

6 Borrowing

The Authority's revised capital financing requirement (CFR) for 2025/26 is £18.231M. The CFR denotes the Authority's underlying need to borrow for capital purposes. If the CFR is positive the Authority may borrow from the PWLB or the market (external borrowing), or from internal balances on a temporary basis (internal borrowing). The balance of external and internal borrowing is generally driven by market conditions. The table under paragraph 5.4 above shows the Authority has borrowings of £0.315m and has utilised £9.665m of cash flow funds in lieu of borrowing. This is a prudent and cost-effective approach in the current economic climate but will require ongoing monitoring if gilt yields remain elevated, particularly at the longer-end of the yield curve (25 to 50 years).

No borrowing was undertaken during the quarter ended 30 September 2025 and it is anticipated that further external borrowing will not be undertaken during this financial year. If the Capital Programme is fully spent in 25/26 then internal borrowing will be required.

7 Debt Rescheduling

No debt rescheduling was undertaken during the quarter.

8 Compliance with Treasury and Prudential Limits

It is a statutory duty for the Authority to determine and keep under review the affordable borrowing limits. During the half year ended 30 September 2025, the Authority has operated within the treasury and prudential indicators set out in the Authority's Treasury Management Strategy Statement for 2025/26. The Director of Resources reports that no difficulties are envisaged for the current or future years in complying with these indicators.

However, during the period ended 30 September 2025 there was an over investment with one counterparty. £4M was invested with Blackpool Council against a limit of £3M. This over-investment was for the period from 22/08/25 to 15/12/25. This was due to a mistake in recording and checking against previous deals that had already been made. This process can be difficult as there are more instances of other Councils looking for forward dated deals. A further checking process (with another Officer involved) has been put in place to help ensure this does not happen again.

9 Annual Investment Strategy

The Treasury Management Strategy Statement (TMSS) for 2025/26, which includes the Annual Investment Strategy, was approved by the Authority on 27/02/2025. In accordance with the CIPFA Treasury Management Code of Practice, it sets out the Authority's investment priorities as being:

- Security of capital
- Liquidity
- Yield

The Authority will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity and with the Authority's risk appetite. In the current economic climate, it is considered appropriate to keep investments short term to cover cash flow needs, but also to seek out value available in periods up to 12 months.

Creditworthiness

The UK's sovereign rating has proven robust through the first half of 2025/26. The Government is expected to outline in detail its future fiscal proposals in the Budget scheduled for 26 November 2025.

Investment Counterparty criteria

The current investment counterparty criteria selection approved in the TMSS is meeting the requirement of the treasury management function.

CDS prices

It is noted that sentiment in the current economic climate can easily shift, so it remains important to undertake continual monitoring of all aspects of risk and return in the current circumstances.

Investment balances

The average level of funds available for investment purposes during the first half of the financial year was **£52.7m**. These funds were available on a temporary basis, and the level of funds available was mainly dependent on the timing of precept payments, receipt of grants and progress on the capital programme.

	Amount 30/09/25	Average
	£	Interest Rate %
Managed By NHC		
Banks	8,000,000	4.21
Building Societies	2,000,000	4.10
Local Authorities	29,000,000	4.28
Government	8,000,000	4.07
Total	47,000,000	4.25

In percentage terms, this equates to:

	Percentage
Government	17
Banks	17
Local Authorities	62
Building Societies	4

The approved 25/26 strategy is that no more than 50% of investments should be placed with Building Societies and Property Funds with a maximum value of £11M. The value at 30 September was 4%.

The pie chart below shows the spread of investment balances as at 30 September 2025. This is a snapshot in time that demonstrates the diversification of investments.

The chart below shows the Council's investment maturity profile.

At the 30 September there was also £2M placed on Lloyds Call account.

The graph below shows the average rate of interest on outstanding investments at 30 September.

Approved limits

Officers can confirm that there was an over investment with one counterparty (Blackpool Council £4M invested with them with a limit of £3M) during the period ended 30 September 2025. Procedures have been put in place to ensure this does not happen again.
