APPENDIX 1: Prudential and Treasury Indicators for 2025-26 as of 31st

December 2025..... 133

Treasury Management Update

Quarter Ended 31st December 2025

The CIPFA (Chartered Institute of Public Finance and Accountancy) Code of Practice for Treasury Management 2021 recommends that members be updated on treasury management activities at least quarterly. This report, therefore, ensures this Council is implementing best practice in accordance with the Code.

1. Economics update

- The third quarter of 2025/26 saw:
 - A -0.1% m/m change in real GDP in October, leaving the economy no bigger than at the start of April.
 - The 3myy rate of average earnings growth excluding bonuses fall to 4.6% in October, having been as high as 5.5% earlier in the financial year.
 - CPI inflation fall sharply from 3.6% to 3.2% in November, with core CPI inflation easing to 3.2%.
 - The Bank of England cut interest rates from 4.00% to 3.75% in December, after holding in November.
 - The 10-year gilt yield fluctuate between 4.4% and 4.7%, ending the quarter at 4.5%.
- From a GDP perspective, the financial year got off to a bumpy start with the 0.3% m/m fall in real GDP in April as front-running of US tariffs in Q1 (when GDP grew 0.7% on the quarter) weighed on activity. Despite the underlying reasons for the drop, it was still the first fall since October 2024 and the largest fall since October 2023. However, the economy surprised to the upside in May and June so that quarterly growth ended up 0.3% q/q (subsequently revised down to 0.2% q/q). Nonetheless, the 0.0% m/m change in real GDP in July, followed by a 0.1% m/m increase in August and a 0.1% decrease in September will have caused some concern (0.1% q/q). October's disappointing -0.1% m/m change in real GDP suggests that growth slowed to around 1.4% in 2025 as a whole.
- Sticking with future economic sentiment, the composite Purchasing Manager Index (PMI) for the UK rose from 51.2 in November to 52.1 in December, suggesting the economy may be benefitting somewhat from pre-Budget uncertainty fading. This may also reflect a diminishing drag from weak overseas demand. While the services PMI rose from 51.3 to 52.1, the improvement in the manufacturing output balance from 50.3 to 51.8 was larger. Indeed, the manufacturing sector has been more exposed to the recent weakness of external demand and has lagged the services sector since the end of last year.
- Turning to retail sales volumes, and the 1.5% year-on-year rise in September, accelerating from a 0.7% increase in August, marked the highest gain since April. Nonetheless, the 0.1% m/m fall in retail sales volumes in November built on the 0.9% m/m drop in October, suggesting the longer-lasting effects of weak employment and slowing wage growth are impacting. Moreover, the decline in the GfK measure of consumer confidence from -17 in October to -19 in November suggests that consumers are not that optimistic at present.
- Prior to the November Budget, the public finances position looked weak. The £20.2 billion borrowed in September was slightly above the £20.1 billion forecast by the OBR. For the year to date, the £99.8 billion borrowed is the second highest for the April to September period since records began in 1993, surpassed only by borrowing during the COVID-19 pandemic. The main drivers of the increased borrowing were higher debt interest costs, rising government running costs, and increased inflation-linked benefit payments, which outweighed the rise in tax and National Insurance contributions.
- Following the 26 November Budget, the Office for Budget Responsibility (OBR) calculated the net tightening in fiscal policy as £11.7bn (0.3% of GDP) in 2029/30, smaller than the consensus forecast of £25bn. It did downgrade productivity growth by 0.3%, from 1.3% to 1.0%, but a lot of that influence was offset by upgrades to its near-term wage and inflation forecasts. Accordingly, the OBR judged the Chancellor was going to achieve her objectives with £4.2bn to spare. The Chancellor then chose to expand that headroom to £21.7bn, up from £9.9bn previously.

- Moreover, the Chancellor also chose to raise spending by a net £11.3bn in 2029/30. To pay for that and the increase in her headroom, she raised taxes by £26.1bn in 2029/30. The biggest revenue-raisers were the freeze in income tax thresholds from 2028/29 (+£7.8bn) and the rise in NICs on salary-sacrifice pension contributions (+£4.8bn). The increase in council tax for properties worth more than £2.0m will generate £0.4bn.
- After the Budget, public net sector borrowing of £11.7bn in November was comfortably below last November's figure of £13.6bn and was the lowest November borrowing figure since 2021, mainly due to tax receipts being £5.4bn higher, largely because of the hike in employer NICs in April 2025. Cumulative borrowing in the first eight months of 2025/26 was still £10bn above last year's total. However, lower inflation and a disposal of assets ahead of the Budget should mean borrowing in 2025/26 comes in below last year's total.
- The weakening in the jobs market looked clear in the spring. May's 109,000 m/m fall in the PAYE measure of employment was the largest decline (barring the pandemic) since the data began and the seventh in as many months. The monthly change was revised lower in five of the previous seven months too, with April's 33,000 fall revised down to a 55,000 drop. More recently, the 38,000 fall in payroll employment in November was the tenth monthly decline in the past 13 months, causing the annual growth rate to slow further, from -0.5% to -0.6%. The number of job vacancies in the three months to November 2025 stood at 729,000 (the peak was 1.3 million in spring 2022) but the less reliable Labour Force Survey data showed that employment fell by 16,000 in the three months to October, with the unemployment rate rising further, from 5.0% to 5.1%. All this suggests the labour market continues to loosen, albeit at a slow pace.
- A looser labour market is driving softer wage pressures. The 3myy growth rate of average earnings including bonuses eased from 4.9% in September to 4.7% in October. And excluding bonuses, the 3myy rate slowed from 4.7% to 4.6%. Regular private sector pay growth continued to slow from 4.2% to 3.9%. That left it broadly on track to meet the Bank's end of December prediction of 3.5%.
- CPI inflation fell sharply in November, easing from 3.6% in October to 3.2%. This was the third consecutive softer-than-expected inflation outturn and suggests that disinflation is well underway. There was a widespread easing in price pressures with inflation slowing in 10 of the 12 main categories. Core inflation fell from 3.4% to 3.2% and services inflation dipped from 4.5% to 4.4%. However, a great deal will depend on the adjustments to regulated and indexed prices scheduled for next April. Capital Economics forecast CPI inflation to drop from 3.2% in March to 2.0% in April, thereby leaving inflation on track to settle at the 2.0% target, or below, by the end of 2026.
- An ever-present issue throughout recent months has been the pressure being exerted on medium and longer dated gilt yields. The yield on the 10-year gilt moved sideways in the second quarter of 2025, rising from 4.4% in early April to a high of c4.8%, before ending June at 4.50%.
- More recently, the yield on the 10-year gilt rose from 4.46% to 4.60% in early July as rolled-back spending cuts and uncertainty over Chancellor Reeves' future raised fiscal concerns. Although the spike proved short lived, it highlighted the UK's fragile fiscal position. In an era of high debt, high interest rates and low GDP growth, the markets are now more sensitive to fiscal risks than before the pandemic. During August, long-dated gilts underwent a particularly pronounced sell-off, climbing 22 basis points and reaching a 27-year high of 5.6% by the end of the month. While yields have since eased back, the market sell-off was driven by investor concerns over growing supply-demand imbalances, stemming from unease over the lack of fiscal consolidation and reduced demand from traditional long-dated bond purchasers like pension funds. For 10-year gilts, by late September, sticky inflation, resilient activity data and a hawkish Bank of England kept yields elevated over 4.70% although, subsequently, gilt yields fell back after the Budget, supported by a tighter fiscal plan, fewer tax hikes required following a smaller-than-expected downgrade to the OBR's fiscal forecast, and a favourable shift in bond issuance away from long-dated debt. Gilt yields hovered around 4.5% at the end of the quarter.
- The FTSE 100 fell sharply following the "Liberation Day" tariff announcement, dropping by more than 10% in the first week of April - from 8,634 on 1 April to 7,702 on 7 April. However, the de-escalation of the trade war coupled with strong corporate earnings led to a rapid rebound starting in late April. As a result, the FTSE 100 ended June at 8,761, around 2% higher than its value at the end of March and more than 7% above its level at the start of 2025. Since then, the FTSE 100 has enjoyed a further significant jump in value. The stock market hit new record highs above 9,900 in Mid-November, driven by a global rebound on hopes of a US government-shutdown resolution, expectations of a December

rate-cut, and strong corporate earnings. Despite some jitters around Budget time, the FTSE 100 closed Q4 at 9,931, 5% higher than at the end of September and 22% higher since the start of 2025.

MPC meetings: 8 May, 19 June, 7 August, 18 September, 6 November, 18 December 2025

- There were six Monetary Policy Committee (MPC) meetings held between April and December. In May, the Committee cut Bank Rate from 4.50% to 4.25%, while in June policy was left unchanged. In June's vote, three MPC members (Dhingra, Ramsden and Taylor) voted for an immediate cut to 4.00%, citing loosening labour market conditions. The other six members were more cautious, as they highlighted the need to monitor for "signs of weak demand", "supply-side constraints" and higher "inflation expectations", mainly from rising food prices. By repeating the well-used phrase "gradual and careful", the MPC continued to suggest that rates would be reduced further.
- In August, a further rate cut was implemented. However, a 5-4 split vote for a rate cut to 4% laid bare the different views within the Monetary Policy Committee, with the accompanying commentary noting the decision was "finely balanced" and reiterating that future rate cuts would be undertaken "gradually and carefully". Ultimately, Governor Bailey was the casting vote for a rate cut but with the CPI measure of inflation expected to reach at least 4% later this year, the MPC was wary of making any further rate cuts until inflation begins its slow downwards trajectory back towards 2%.
- With wages still rising by just below 5%, it was no surprise that the September meeting saw the MPC vote 7-2 for keeping rates at 4% (Dhingra and Taylor voted for a further 25bps reduction). Moreover, the Bank also took the opportunity to announce that they would only shrink its balance sheet by £70bn over the next 12 months, rather than £100bn. The repetition of the phrase that "a gradual and careful" approach to rate cuts is appropriate suggested the Bank still thought interest rates will fall further.
- At the 6 November meeting, Governor Bailey was once again the deciding vote, keeping Bank Rate at 4% but hinting strongly that a further rate cut was imminent if data supported such a move. By 18 December, with November CPI inflation having fallen to 3.2%, and with Q2 GDP revised down from 0.3% q/q to only 0.2% q/q, and Q3 GDP stalling at 0.1%, the MPC voted by 5-4 to cut rates further to 3.75%. However, Governor Bailey made it clear that any further reductions would require strong supporting data, and the pace of any further decreases would be slow compared to recent months. The markets expect Bank Rate to next be cut in April.

2. Interest rate forecasts

The Authority has appointed MUFG Corporate Markets as its treasury advisor and part of their service is to assist the Authority to formulate a view on interest rates. MUFG Corporate Markets provided the following forecasts and commentary on 22 December 2025. These are forecasts for Bank Rate, average earnings and PWLB certainty rates, gilt yields plus 80 bps.

MUFG Corporate Markets Interest Rate View 22.12.25													
	Mar-26	Jun-26	Sep-26	Dec-26	Mar-27	Jun-27	Sep-27	Dec-27	Mar-28	Jun-28	Sep-28	Dec-28	Mar-29
BANK RATE	3.75	3.50	3.50	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25	3.25
3 month ave earnings	3.80	3.50	3.50	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30	3.30
6 month ave earnings	3.80	3.50	3.50	3.40	3.30	3.30	3.30	3.40	3.40	3.40	3.40	3.40	3.40
12 month ave earnings	3.90	3.60	3.60	3.50	3.40	3.50	3.50	3.50	3.50	3.50	3.60	3.60	3.60
5 yr PWLB	4.60	4.50	4.30	4.20	4.10	4.10	4.10	4.10	4.10	4.10	4.10	4.10	4.10
10 yr PWLB	5.20	5.00	4.90	4.80	4.80	4.70	4.70	4.70	4.70	4.60	4.60	4.60	4.70
25 yr PWLB	5.80	5.70	5.60	5.50	5.50	5.40	5.30	5.30	5.30	5.20	5.20	5.20	5.20
50 yr PWLB	5.60	5.50	5.40	5.30	5.30	5.20	5.10	5.10	5.10	5.00	5.10	5.00	5.00

- Our last interest rate forecast update was undertaken on 11 August. Since then, a combination of tepid growth (0.2% q/q GDP for Q2 and 0.1% q/q GDP for Q3), falling inflation (currently CPI is 3.2%), and a November Budget that will place more pressure on the majority of households' income, has provided an opportunity for the Bank of England's Monetary Policy Committee to further reduce Bank Rate from 4% to 3.75% on 18 December.
- Surprisingly, to most market commentators, the recent steep fall in CPI inflation in one month from 3.6% to 3.2% did not persuade most "dissenters" from the November vote (Lombardelli, Greene, Mann and Pill) to switch to the rate-cutting side of the Committee. Instead, it was left to Bank Governor, Andrew Bailey, to use his deciding vote to force a rate cut through by the slimmest of margins, 5-4.

- Given the wafer-thin majority for a rate cut it was not unexpected to hear that although rates would continue on a “gradual downward path”, suggesting a further rate cut or cuts in the offing, MPC members want to assess incoming evidence on labour market activity and wage growth. Indeed, with annual wage growth still over 4.5%, the MPC reiterated that the case for further rate cuts would be “a closer call”, and Governor Bailey observed there is “limited space as Bank Rate approaches a neutral level”.
- Accordingly, the MUFG Corporate Markets forecast has been revised to price in a rate cut in Q2 2026 to 3.5%, likely to take place in the wake of a significant fall in the CPI inflation reading from 3% in March to 2% in April (as forecast by Capital Economics), followed by a short lull through the summer whilst more data is garnered, and then a further rate cut to 3.25% in Q4.
- As in August, nonetheless, threats to that central scenario abound. What if wage increases remain stubbornly high? There are, after all, several sectors of the domestic economy, including social care provision and the building/construction industries, where staff shortages remain severe. Moreover, by May 2026, following the local elections, we will have a better handle on whether or not the Starmer/Reeves team is going to see out the current Parliament or whether they face a Leadership challenge from within their own party. If so, how will gilt markets react to these variables...and will there be additional geo-political factors to also bake in, particularly the Fed’s monetary policy decisions in 2026 and the ongoing battle to lower rates whilst inflation remains close to 3%.
- Accordingly, our updated central forecast is made with several hefty caveats. We are confident, as we have been for some time, that our forecast for Bank Rate and the 5-year PWLB Certainty Rate is robust, and we have marginally brought forward the timing of the next rate cut(s). But for the 10-, 25- and 50-years part of the curve, the level of gilt issuance, and the timing of its placement, will be integral to achieving a benign trading environment. That is not a “given”, and additionally, the inflation outlook and political factors domestically and, crucially, in the US, are also likely to hold sway. Matters should be clearer by June in the UK, but the US mid-term elections are scheduled for November.
- Our revised PWLB rate forecasts are based on the Certainty Rate (the standard rate minus 20 bps) which has been accessible to most authorities since 1 November 2012. Please note, the lower Housing Revenue Account (HRA) PWLB rate started on 15 June 2023 for those authorities with an HRA (standard rate minus 60 bps) and is set to prevail until at least the end of March 2026. Hopefully, there will be a further extension to this discounted rate announced in January.
- Money market yield forecasts are based on expected average earnings by local authorities for 3 to 12 months.

Gilt yields and PWLB rates

The overall longer-run trend is for gilt yields and PWLB rates to fall back over the timeline of our forecasts, but the risks to our forecasts are generally to the upsides. Our target borrowing rates are set **two years forward** (as we expect rates to fall back) and the current PWLB (certainty) borrowing rates are set out below: -

PWLB borrowing	Current borrowing rates as at 22.12.25 p.m. %	Target borrowing rate now (end of Q4 2027) %	Target borrowing rate previous (end of Q4 2027) %
5 years	4.81	4.10	4.20
10 years	5.39	4.70	4.70
25 years	6.01	5.30	5.30
50 years	5.78	5.10	5.10

Borrowing advice: Our long-term (beyond 10 years) forecast for the neutral level of Bank Rate remains at 3.5%. As all PWLB certainty rates are still above this level, borrowing strategies will need to be reviewed in that context. Overall, better value can be obtained at the shorter end of the curve (<5 years PWLB maturity/<10 years PWLB EIP) and short-dated fixed LA to LA monies should also be considered. Temporary borrowing rates will, generally, fall in line with Bank Rate cuts.

3. Annual Investment Strategy

The Treasury Management Strategy Statement (TMSS) for 2025/26, which includes the Annual Investment Strategy, was approved by the Council on 27/02/25. In accordance with the CIPFA Treasury Management Code of Practice, it sets out the Council's investment priorities as being:

- Security of capital
- Liquidity
- Yield

The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity, aligned with the Council's risk appetite. In the current economic climate, over and above keeping investments short-term to cover cash flow needs, there is a benefit to seeking out value available in periods up to 24 months.

As shown by the charts below and the interest rate forecasts in section 2, investment rates have started to taper downwards during the final quarter of 2025 and are expected to fall back further if inflation falls through 2026 and the MPC loosens monetary policy further.

Creditworthiness.

There have been few changes to credit ratings over the quarter under review. However, officers continue to closely monitor these, and other measures of creditworthiness to ensure that only appropriate counterparties are considered for investment purposes.

Investment counterparty criteria

The current investment counterparty criteria selection approved in the TMSS is meeting the requirement of the treasury management function.

CDS prices

For UK and international banks, these have remained low, and prices are not misaligned with other creditworthiness indicators, such as credit ratings. **Nevertheless, it remains important to undertake continual monitoring of all aspects of risk and return.**

Investment balances

The average level of funds available for investment purposes during the quarter was **£49.5m**. These funds were available on a temporary basis, and the level of funds available was mainly dependent on the timing of precept payments, receipt of grants and progress on the capital programme.

	Amount	Average
	£	Interest Rate %
Managed By NHC		
Banks	4,500,000	4.17
Building Societies	0	0
Local Authorities	34,000,000	4.22
Government	3,000,000	3.78
Total	41,500,000	4.20

In percentage terms, this equates to:

	Percentage
Government	7
Banks	11
Local Authorities	82
Building Societies	0

The approved 25/26 strategy is that no more than 50% of investments should be placed with Building Societies and Property Funds with a maximum value of £11M. The value at 30 December was zero.

The pie chart below shows the spread of investment balances as at 30 December 2025. This is a snapshot in time that demonstrates the diversification of investments.

The chart below shows the Council's investment maturity profile.

The graph below shows the average rate of interest on outstanding investments at 31 December.

Approved limits

Officers can confirm that the approved limits within the Annual Investment Strategy were not breached during the quarter ended 31st December 2025.

4. Borrowing

No borrowing was undertaken during the quarter ended 31st December 2025.

It is anticipated that new borrowing will be undertaken during this financial year but this is dependant on the spend in the Capital Programme.

Loans Outstanding at 31 December 2025:

	Amount	Average Interest Rate
	£	%
Public Works Loans Board	£315k	10.85

Estimated outstanding debt:

Year	Forecast Borrowing £m	Forecast other long-term liabilities £m *	Less: Internal Borrowing £m	Forecast Total External Debt £m	Operational Boundary £m	Authorised Limit £m
31 st March 2025 (Forecast)	16.368	0.562	16.334	0.596	2.0	7.0
31 st March 2026 (Forecast)	21.735	5.984	21.702	6.017	26.0	31.0
31 st March 2027 (Forecast)	22.810	5.122	22.778	5.154	29.0	34.0
31 st March 2028 (Forecast)	22.297	4.258	22.266	4.289	29.0	34.0
31 st March 2029 (Forecast)	30.094	3.395	30.064	3.425	32.0	37.0

* Comprises the finance lease relating to Letchworth Multi-storey car park

The external borrowing forecast can be used to give an indication of the borrowing that may be required, which is combined with outstanding existing borrowing. The Council will also borrow for short-term cash-flow needs if required. The actual borrowing that is taken out will depend on the latest forecasts and the offers that are available at the time that it is required. There will also be a consideration of when any other borrowing becomes due, with the aim of achieving a spread of these dates. This is to try and avoid refinancing risk. The Council is required to set indicators for the maturity structure of its borrowing. Given the low level of borrowing that the Council currently has and is forecast to have, it is considered appropriate to maintain full flexibility as to the exact duration of any borrowing undertaken.

To manage refinancing risk, the Council sets limits on the maturity structure of its borrowing. However, these indicators are set relatively high to provide sufficient flexibility to respond to opportunities to repay or take out new debt (if it was required), while remaining within the parameters set by the indicators.

Maturity Period	Lower %	Upper %
Under 12 months	0	100
12 months to 2 years	0	100
2 years to 5 years	0	100
5 years to 10 years	0	100
10 years to 20 years	0	100
20 years and above	0	100

The Prudential Indicator below considers the cost of borrowing as a % of the net revenue budget of the Council.

Year	Estimated cost of borrowing £m	Forecast net revenue budget £m	Estimated cost of borrowing as a % of net revenue budget
2025/26	0.034	19.980	0.170
2026/27	1.481	27.321	5.421
2027/28	1.572	26.287	5.980
2028/29	1.485	21.978	6.757

The Council is required to set a prudential indicator that estimates financing costs (cost of borrowing less income from investments) as a percentage of its net revenue budget.

Year	Estimated cost of borrowing £m	Less: Forecast of interest earned £m	Net Financing Costs £m	Forecast net revenue budget £m	Estimated cost of borrowing as a % of net revenue budget
2025/26	0.340	2.000	-1.660	19.980	-8.308
2026/27	1.481	0.560	0.921	27.321	3.371
2027/28	1.572	0.379	1.193	26.287	4.538
2028/29	1.485	0.237	1.248	21.978	5.678

5. Debt rescheduling

No debt rescheduling was undertaken during the quarter.

6. Compliance with Treasury and Prudential Limits

The prudential and treasury Indicators are shown in Appendix 1.

It is a statutory duty for the Council to determine and keep under review the affordable borrowing limits. During the quarter ended 31st December 2025, the Council has operated within the treasury and prudential indicators set out in the Council's Treasury Management Strategy Statement for 2025/26. The Director of Resources reports that no difficulties are envisaged for the current or future years in complying with these indicators.

All treasury management operations have also been conducted in full compliance with the Council's Treasury Management Practices.

APPENDIX 1: Prudential and Treasury Indicators for 2025-26 as of 31st December 2025

Treasury Indicators	2025/26 Budget £'000	31.12.25 Actual £'000
Authorised limit for external debt	14,000	315
Operational boundary for external debt	9,000	315
Gross external debt	6,289	315
Investments	Ave Yr 22,000	41,500
Net borrowing	-15,711	-41,185
Maturity structure of fixed rate borrowing - upper and lower limits		
Under 12 months	21	21
12 months to 2 years	21	21
2 years to 5 years	40	40
5 years to 10 years	15	15
Over 10 years	250	250
Upper limit for principal sums invested over 365 days		
	6000	0

Prudential Indicators	2025/26 Budget £'000	31.03.25 Actual £'000
Capital expenditure	26,416	15,182
Capital Financing Requirement (CFR)	20,600	10,013
In year borrowing requirement	16.368	0.315
Ratio of net financing costs to net revenue stream	1.9%	-6.71
