

**Strategic Environmental Assessment
Screening Determination Statement
For North Hertfordshire District Council
Design Code Supplementary
Planning Document**

1. Introduction

- 1.1 This report sets out a Screening Determination for the North Hertfordshire District Council Design Code Supplementary Planning Document (hereafter Design Code SPD), and has been prepared by North Hertfordshire District Council. The purpose of the screening is to assess if the Design Code SPD requires a Strategic Environmental Assessment (SEA). More detail is given in the following sections on SEA (section 2), Supplementary Planning Documents (section 3) and the Design Code SPD specifically (section 4).
- 1.2 The assessment of the Design Code SPD and the Determination is included in sections 5, 6 and 7.

2. Strategic Environmental Assessment Context

- 2.1. European Union Directive 2001/42/EC requires SEA to be undertaken for certain types of plans or programmes that could have significant environmental effects. The Directive has been transposed into law for England and Wales in the Environmental Assessment of Plans and Programmes Regulations 2004 (the Regulations). The purpose of Strategic Environmental Assessment is to promote sustainable development through assessing the extent to which the plan will help to achieve relevant environmental, economic and social objectives.
- 2.2. Under Regulation 9 of the Regulations, the responsible body (local parish or town council or neighbourhood forum) is required to determine whether a plan or programme is likely to have significant environmental effects, and therefore whether SEA is required. This process is called screening. It is undertaken using a specified set of criteria (set out in Schedule 1 of the Regulations). The Regulations require that the results of this process are set out in a Screening Determination (this document), which must be publicly available.
- 2.3. Before the responsible body makes a formal determination, there is a requirement to consult three statutory consultation bodies designated in the Regulations (Historic England, the Environment Agency and Natural England) on whether an environmental assessment is required. This consultation took place alongside consultation on the draft SPD.

3. Supplementary Planning Documents and Strategic Environmental Assessment

- 3.1. Planning Practice Guidance states that:
 - 3.1.1. Supplementary planning documents do not require a sustainability appraisal but may in exceptional circumstances require a strategic environmental assessment if they are likely to have significant environmental effects that

have not already have been assessed during the preparation of the Local Plan.

3.1.2. A strategic environmental assessment is unlikely to be required where a supplementary planning document deals only with a small area at a local level (see regulation 5(6) of the Environmental Assessment of Plans and Programmes Regulations 2004), unless it is considered that there are likely to be significant environmental effects.

3.1.3. Before deciding whether significant environment effects are likely, the local planning authority should take into account the criteria specified in schedule 1 to the Environmental Assessment of Plans and Programmes Regulations 2004 and consult the consultation bodies¹.

3.2. This Screening Determination has taken account of this Guidance in reaching its conclusions.

4. Design Code SPD

4.1. The Design Code SPD sets out the aspirations for North Hertfordshire, setting out the local context in terms of landscape and built environment and what measures can be taken to create high quality development in a sustainable way which addresses climate change. Paragraph 126 of the NPPF identifies visual tools such as design guides to provide clarity about design expectations.

4.2. The National Planning Policy Framework (NPPF)² defines Supplementary Planning Documents (SPDs) as documents which add further detail to the policies in the development plan. SPDs are capable of being a material consideration in planning decisions but are not part of the statutory Development Plan.

4.3. SPDs do not have the same status as the policies within the Development Plan and are not subject to an independent Examination. However, SPDs must undergo public consultation and are considered as material considerations when determining planning applications.

4.4. A review of the Council's current planning guidance was undertaken in 2017. This identified that the Council's Design Supplementary Planning Document (SPD) dating from 2011 should be prioritised for updating. This review of current Council planning guidance, and the identification of documents to be produced in the future, was considered and approved by Cabinet on 25th July 2017.

² Annex 2: Glossary

5. Screening Assessment

- 5.1. As noted above, the Regulations specify a set of criteria which must be used to assess whether any plan covered by the Regulation is likely to have a significant environmental effect and therefore require a SEA. The table below considers each of these criteria in turn.

Table 1: Assessment of likelihood of significant effects on the environment

Criteria for determining the likely significance of effects	Likely to have significant effects?	Justification for assessment
1 (a) the degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources	No	The SPD provides greater detail on the policy and principles established in the North Hertfordshire Local Plan. The Local Plan has been subject to a comprehensive Sustainability Appraisal (SA) incorporating Strategic Environmental Assessment (SEA). The purpose of the SPD is to provide guidance on the design of development policies (principally Policy SP9 and Policy D1 which has been subject to SA / SEA through the process above).
1 (b) the degree to which the plan or programme influences other plans or programmes including those in a hierarchy.	No	The SPD is intended to supplement Local Plan policies and sits below the Local Plan in terms of the planning hierarchy. The SPD must be in general conformity with the strategic policies of the Local Plan.
1 (c) the relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting sustainable development	No	The SPD is highly relevant in terms of promoting sustainable development as it seeks to ensure the effective and consistent implementation of the design and sustainability policies. The aim of these policies is to ensure that development proposals create high quality sustainable development.

1(d) environmental problems relevant to the plan	No	There are no environmental problems relevant to the SPD. The policies within the North Hertfordshire Local Plan that the SPD supplement are not expected to have any significant effects on the environment.
1 (e) the relevance of the plan or programme for the implementation of community legislation on the environment (e.g. plans and programmes linked to waste management or water protection)	No	The SPD is not relevant to the implementation of EC legislation such as waste management or water protection.
2 (a) the probability, duration, frequency and reversibility of the effects	No	<p>The anticipated effects on the sustainability of North Hertfordshire are expected to be positive by providing guidance to support policies designed to create sustainable, high quality new development.</p> <p>The duration of the effects is difficult to define; the effects will be linked to a planning permission which is (usually) permanent unless superseded by a subsequent permission on the same site.</p>
2 (b) the cumulative nature of the effects	No	The Local Plan SA/SEA expects overall positive benefits to arise from the specific policies related to design of development that the SPD relates to.
2 (c) the trans-boundary nature of the effects	No	Design implications will be local to North Hertfordshire district and only indirect effects are expected cross-boundary, for example, where sites straddle a boundary or are located adjoining another authority.
2 (d) the risks to human health or the environment (e.g. due to accidents)	No	No significant effects have been identified.

2 (e) the magnitude and spatial extent of the effects (geographical area and size of the population likely to be affected)	No	The SPD will be applied to all residential-led planning applications over 2 homes.
2 (f) the value and vulnerability of the area likely to be affected due to: (i) special natural characteristics or cultural heritage (ii) exceeded environmental quality standards (iii) intensive land-use	No	The SPD is not be able to set policy related to specific land uses. The SPD will only affect the way in which the development is designed and functions.
2 (g) the effects on areas or landscapes which have a recognised national, community or international protection status	No	None identified. Any applications for development will be required to satisfy the relevant policies for protection of the character of the area before permission is granted.

6. Consultation Responses

- 6.1. A screening determination was produced alongside the consultation on the draft Design Code Supplementary Planning Document. The Council consulted the three statutory consultation bodies designated in the Regulations (Historic England, the Environment Agency & Natural England) on whether a strategic environmental assessment was required.
- 6.2. Following consultation, responses were received from Historic England, Natural England and the Environment Agency. The response from Historic England supported the conclusion of the SEA Screening Determination that the Design Code SPD is not likely to have significant environmental effects and therefore a SEA is not required. Natural England had no comments to make on the SEA Screening Opinion. The Environment Agency confirmed that they had no comments to make at the screening stage.
- 6.3. Consequent to the above, no consultation responses were received which altered the preliminary findings of this screening determination.
- 6.4. Consultation on the draft SPD took place between 4 March and 2 April. A total of 66 responses were received (including the two responses referenced above). Outside the responses identified above, these did not directly address the SEA Screening Opinion.
- 6.5. The changes made to the SPD in response to the consultation are largely technical and do not substantively impact upon the scope, intent and anticipated outcomes of the previous exercise

7. Screening Determination

7.1. In summary, it is the Council's opinion that the Design Code SPD is not likely to have significant environmental effects and therefore a SEA is not required. The principal reasons for this opinion are that:

- The development plan policies supplemented by this SPD have themselves been subjected to SA and SEA. The SA conclusion on Policy SP9 states that the policy should help to ensure that the Plan delivers against a number of the SA framework objectives and is particularly important given the new scale of development proposed by the Plan. The appraisal of proposed main modifications to the emerging Local Plan did not indicate any change to this.
- The SPD is only entitled to provide guidance to existing policies, it is not expected that they would alter the conclusions reached in the Local Plan SA/SEA. The SPD cannot set new policy. It has been prepared to build upon the Local Plan policies and provide guidance to applicants regarding infrastructure provision (in accordance with the NPPF).

7.2. On the basis of the above, and considering the SE/SEA undertaken at a higher level through the preparation of the Local Plan, and the effects expected, North Hertfordshire District Council concludes that the Design Code Supplementary Planning Document does not require a full SEA to be undertaken.
