Dear Sirs

**Letchworth Garden City – Future High Street Fund Application**

On behalf of Letchworth Garden City Heritage Foundation, I am pleased to confirm our support for the Future High Street Fund application from North Herts District Council for a health-led town centre regeneration project. We strongly believe this project will deliver a transformative impact on our local town centre economy significantly increasing footfall from across Letchworth's communities whilst simultaneously delivering improved primary and public health outcomes for local residents. With strong private sector investment complemented by public and charitable funds this project offers exceptional value for money.

This project will also provide a transferable model for other towns to re-purpose failing shopping precincts into community anchors combining improved public services, mixed retail and engaging civic spaces.

Yours faithfully

Graham Fisher  
Chief Executive
